NOTICE.

IN again presenting our Spring Catalogue, we do so with much pleasure, having added largely by importation of everything new and valuable among the various classes.

We especially offer to the notice of our patrons many extremely rare and beautiful plants. The charming new Rose Beauty of Glazenwood; the beautiful new Double Poinsettia; new Tuberous rooted Begonias; new Pelargoniums, as well as Novelties among Fuchias, Marantas, Roses, Dahlias, &c

When selections are left to ourselves, the very finest varieties will be sent, and the most vigorous plants, as all orders are selected under our personal supervision.

After many years' experience in packing and forwarding plants to distant countries, we flatter ourselves we can pack both economically and safely for any distance. *Orders to the amount of five dollars and upwards packed free of charge.*

The greater part of the new plants, and nearly all the bedding plants can be forwarded by mail at the prices quoted; on their reception they should be potted and placed in a frame or greenhouse to recover the effects of the journey. To Florists and Nurserymen who wish new plants, the mail offers the greatest facility for obtaining such, as they know how to care for them on their arrival. Amateurs who have no means of caring for plants after a journey through the mail, as well as all persons requiring a considerable quantity of plants of a larger size, had better have their orders by express. If left to me, I will forward in such way as I deem best for the purchaser.

The prices at which some of the new plants are offered, may appear high to persons unacquainted with the importation of these articles. For such we have to pay high prices in Europe, adding duty, freight, risks, &c., to justify which when first offered, the price should be proportionate—though we make it at the lowest possible rates, and as stock increases the price is reduced. Older and standard varieties are offered at our usual very moderate rates.

Orders intended for mailing should be accompanied with a remittance, but in express orders the purchaser may remit, or the article will be forwarded C. O. D. at his option.

Customers who fail to receive a catalogue in due time, will please inform us of the same, that a copy may be sent, as catalogues are frequently lost in the mails.

We charge for catalogues to applicants who have not previously purchased, but when, however, orders are subsequently sent, the price of the catalogue will be allowed.

JOHN SAUL.

January, 1877.

CATALOGUE

OF

New, Rare and Beautiful Plants.

New, Rare and Beautiful Plants.

***BEAUTY OF GLAZENWOOD.**—*New Striped Rose, with a Colored Plate.*

"A Hybrid Tea, of a most distinct and novel kind, unlike any other variety already known, and may possibly prove to be an entirely new genus. The ground tint is a lovely golden yellow, darker than, but after the style of, Madame Falcot, each petal being distinctly striped, and flaked with a bright carmine, as often seen in the coloration of some Tulips, the buds, before expanding, being boldly and beautifully marked with crimson. The foliage is grand, of a beautifully light satiny-green, the serrated edges being marked with red. The odor is delicately sweet, as in the generality of Tea Roses; the flower is of good shape and build, with plenty of petal; the flower-buds pointed, and very handsome. It is impossible to convey by description the marking and beauty of this charming Rose; but it is, without doubt, the most striking novelty introduced for years." Price, \$1 each. Strong, \$1.50.

"A Rose of golden yellow, striped and flaked with scarlet or vermilion, sounds like a dream or a fairy tale; it is, nevertheless, a reality"

H. CURTIS in THE GARDEN.

***POINSETTIA PULCHERRIMA PLENISSIMA.**—*New Double Poinsettia.*

This magnificent plant is remarkable for the distinct character of its floral bracts, the size of the heads in which they are produced, and their marvellous brilliancy of color. Instead of the bracts being borne in a single head and spreading out as in the old form, in this new double kind they are gathered into clusters, which fill up the centre, so that the whole inflorescence is full and rosette-like, and of a most vivid and brilliant scarlet color. It is strikingly effective and gorgeously beautiful. Price, \$2 each.

The *Journal of Horticulture* of December 16th, 1875, announcing the flowering of the plant in Europe for the first time, remarks—"The examples which we have seen of this plant are remarkable alike for the size of the heads, their form, the distinct character of the bracts, and their marvellous brilliancy of color. In the old type the plant is surmounted by a single cluster of small yellow flowers, from the base of which the bracts radiate in a horizontal manner. In the new form, the central or primary cyme, which is surrounded by splendid bracts, is, as it were, the root of other flowers, which spring from it on short simple stems, each surmounted by flowers and bracts; and these secondary heads become further sub-divided, and forming also perfect flowers and bracts, the head, in fact, culminating in a multiplicity of parts, each perfect and of extraordinary brilliancy.

"The head, which we particularly noted, was 16 inches in diameter, and from the base to the apex of the cone of drooping bracts was 11 inches in depth. The bracts in this head were fifty in number, arranged in seven separate cymes which had sprung from the primary base. The color is super-

lately brilliant, as if a delicate tint of orange floated over the intense scarlet, imparting a more dazzling appearance than is possessed by the old species. If the designation, 'A Cone of Fire,' is applicable to any plant in existence, this is the one."

***NEW WHITE HYDRANGEA, "THOMAS HOGG."**

This, the finest of all Hydrangeas, was sent to the United States by Mr. Thomas Hogg, from Japan. It has been exhibited in flower at the Massachusetts Horticultural Society's weekly meeting in Boston, where it took the Society's silver medal for new plants; and also, at the New York Horticultural Society's monthly meeting in May. In the report of that meeting, the "American Agriculturist" says: "We think it safe to say, that no ornamental plant ever introduced exceeds this in value."

It belongs to the Hortensia section of the family, but is a far more free and abundant bloomer than any other; for the Florist, and for all decorative purposes it will be invaluable; the flowers are of the purest white, of very firm texture, and continues in flower for a great length of time. It will no doubt prove quite as hardy as the old Hortensia. Price, \$2.50 each. (Ready in April.)

BEAUTY OF OXTON.—*New Regal Pelargonium.

A splendid novelty, the flowers of similar form to those of *Pelargonium Queen Victoria*, but of quite a distinct color. The upper petals are of a very rich maroon color, darkly blotched; under petals very dark crimson, shaded with maroon; light centre tinted with rose; all the petals are attractively and regularly margined with white, and beautifully fringed. The flowers are large and very full, the extra number of petals giving them the appearance of being semi-double. Price, \$2 each. (Ready in April.)

PELARGONIUM QUEEN VICTORIA.—*Colored Plate in 1875.

To say that this is handsome conveys but an inadequate idea of it, for it is the most marvellously beautiful and novel variety ever offered.

The flowers have peculiarly crispy petals; they are not really double, but from their fulness of form and extra number of petals have the appearance of being so. The color is a rich vermilion, all the petals broadly margined with pure white, and the upper ones blotched with maroon. The contrast of the broad white margin with the vermilion ground color makes the flower extremely pleasing and attractive. Price, 75 cents each.

***PELARGONIUM CAPTAIN RAKES.**

This *Pelargonium* belongs to the French type of flower, and, on account of the blooms being semi double, the petals do not readily fall when cut for bouquet-making. This fact alone will render it simply invaluable, wherever cut blooms are required, at all seasons of the year. It is of a vigorous, free branching habit, producing large and ample dark green leaves. The trusses of bloom are borne well up above the foliage, and are both numerous and large, whilst the individual flowers are large and full, upper petals deep fiery crimson, flaked with purplish black and bordered with carmine; lower petals clear, bright, fiery crimson. Price 75 cents each.

***PELARGONIUM TRIOMPHE DE ST. MAUDE.**

Fully sustains its character as one on the best high-colored varieties in cultivation. The habit is just what one looks for in a *Pelargonium*—close and short-jointed; it is profuse of bloom and the flowers are large and of massive substance. These can be grown much more easily, as a general rule, than the more delicate higher-bred varieties. *Triomphe de St. Maude* is a fine conservatory plant while it is a telling exhibition variety. \$1 each. (Ready in April.)

KÖNIG ALBERT.—*New Double-flowered Ivy-leaved Pelargonium.*

This novel variety is originated by HERR LIEBMANN of Dresden, and is described as a very effective form, with flowers of a bright violet-pink color, of good shape and double form. It has received several First-class Certificates of merit at the Continental Exhibitions. 40 cents each.

***THE GHOST, (LAXTON.)**—*New Double Geranium.*

Flower pure ivory-white, finely formed, petals waxy and of great substance—a decided acquisition in double whites, and especially adapted for bouquets. \$1 each.

***SOPHIA CLAPTON, (LAXTON.)**—*New Double Geranium.*

The plant has the remarkably dwarf and shrubby habit and pale green foliage of Guiding Star. Flower very full, pretty, Hepatica-shaped, bright purplish scarlet. \$1 each.

***WILFRID, (LAXTON.)**—*New Double Geranium.*

A beautiful pearl white flower, fuller and more perfect in form than Aline Sisley, very pretty and remarkably distinct—decidedly the best of its class yet sent out. \$1 each.

WONDERFUL, (SMITH.)—*New Double Geranium.*

An exceedingly vigorous variety of fine habit, giving freely its immense trusses of bloom, which are of an intense orange scarlet; a magnificent bedding plant. \$1 each.

***MME. AMELIE BALTET, (LEMOINE)**—*New Double White Geranium.*

"A very good and distinct variety, having pale green leaves and pure white double flowers, borne in compact trusses well above the foliage. It is the best sent amongst others by M. Lormaine to Chiswick for trial."—*London Garden.*

The finest of all double white Geraniums. \$1 50 each. (Ready in April.)

***M. BUCHLER, (LEMOINE.)**

A dwarf habited variety, bearing well elevated trusses of purplish crimson double flowers, well worth culture as a decorative pot plant from its fine habit. \$1 each.

***DEPUTE VIOX, (LEMOINE.)**—*New Double Geranium.*

A very showy plant, having immense trusses of fine double flowers of a carmine tinted violet and fiery red, fine habit and free bloomer, a fine and distinct variety. \$1 each.

***LA CONSTITUTION, (LEMOINE.)**—*New Double Geranium.*

This beautiful variety has flowers of a glowing salmon, very brilliant, trusses large and double, a free bloomer, neat habit. A fine plant for bedding or pot culture from its very distinct color and habit. \$1 each.

***EUGENE BAUDOIN.**—*New Double Geranium.*

Large double trusses, light rosy crimson color, centre spotted with white, a distinct and striking variety; fine habit and free bloomer. \$1 each.

***HENRI BEURIER.**—*New Double Geranium.*

A fine large truss, color a rich salmon orange, very striking; fine habit, free bloomer, a grand bedding variety and a nice pot plant. \$1 each.

EMILY LAXTON, (LAXTON.)—*New Double Geranium.*

The largest flowered and most remarkable Scarlet Pelargonium, either double or single, hitherto sent out. Individual flowers upwards of 2 inches in diameter; full but not crowded—truss enormous. Free flowering and suitable for winter work. 50 cents each.

GUIDING STAR, (LAXTON.)—*New Double Geranium*

The most shrubby and dwarf Double Pelargonium yet raised. Foliage pale green and partaking somewhat of the character and habit of the Show Pelargonium. Flower very pretty purplish pink and double, quite unique and distinct; a beautiful variety. 50 cents each.

ILLUMINATOR, (LAXTON.)—*New Double Geranium.*

A striking and distinct purplish carmine colored variety of the Emily Laxton type, but darker in color, with full petals large and stout; fine habit and free bloomer; very distinct and beautiful. 50 cents each.

GOLDEN BRONZE GERANIUMS.**HAPPY THOUGHT.**—*New Golden Bronze.*

Each.

A very unique and attractive variety of the Zonale Section, differing from the ordinary group; instead of the usual yellow outer belt or margin, in this instance, the color forms a large conspicuous cream yellow blotch in the centre or disc of the leaf, and thus adds a very novel and picturesque feature for a flower garden. The flower is a rich magenta rose, tinted with scarlet on the upper lobes.....	\$0 40
The Shah. Large well-formed leaves with a bright broad chocolate zone, deep yellow leaf ground, splendid habit. First Prize at the Bath Show of the Royal Horticultural Society, as the best Gold and Bronze Pelargonium.....	0 40
John Offin. This fine variety has proved to be the best for bedding purposes. It has been extensively used for three years, and is considered the brightest yellow, with bright red zone, ever seen	0 40
Prince Arthur. One of the finest of the dark zoned varieties, the colors being bright and clear, neat habit, very fine.....	0 40

SILVER TRICOLOR and SILVER MARGINED GERANIUMS.

Each.

Avalanche. This is a most profuse bloomer, small trusses and blooms, with a snow white variegation.....	\$0 40
Blushing Bride. Silver variegated, with blush white flowers, similar to Madame Vaucher; robust and compact habit.....	0 50
The Countess. Fine broad flat leaf, with snow white margin; neat habits.....	0 50
Bright Star. It has a pure white edge to the foliage, rich, well formed scarlet flowers.....	0 40
Eva Fish. An effective narrow rich lake rose zone, on a vandyked chocolate ground, with a well proportioned white leaf margin.....	0 40

	Each.
Excellent. A fine improvement in this class, with a very high-colored carmine scarlet zone; fine habit and grower, with a good flat leaf.....	0 50
Queen of the Day. A fine large flat leaf, scarlet zone, not so regular as the above-mentioned two, but very brightly streaked, dark zone, neatly edged with white; a most desirable variety.....	0 50
Mrs. Vidler. A great improvement on <i>Bijou</i> , a fine broad leaf, pure white margin, a very fine variety.....	0 50

NEW HYBRID PERPETUAL PELARGONIUMS.

This new section is of Bavarian origin, and is recommended for its perpetual free-blooming character and the glowing colors of the flowers. The plants commence blooming in the spring and continue until the autumn.

	Each.
Hofgärtner Kellermann. A round close flower, the upper petals of a dark fiery carmine red color, with strongly marked dark spots and veins, the under petals light carmine, lightly veined.....	\$0 50
Hofgärtner Huber. A fine round flower; the upper petals rosy purple, darkly spotted and veined, the under petals rosy carmine, with light veins.....	0 50
Hofgärtner Braun. A beautiful flower, of a very fine carmine color, with intensely dark veins and spots.....	0 50
Madame Glevitsky. A magnificent flower; upper petals of a fine vermilion color, veined and spotted with purple, under petals light vermilion.....	0 50
Eleonore Petit. Fine deep red spotted, a profuse bloomer; very beautiful,	0 50

PELARGONIUM FILICIFOLIA ODORATA.

This was raised from the old *Denticulata*, but is much more finely cut in the leaf, and is a very strong grower. It never changes its beautiful Fern-like appearance, and is one of the easiest Geraniums to grow at all seasons of the year. The fragrance is pleasing, and it is an exceedingly beautiful plant..... 0 30

PELARGONIUM SCABRUM.

This is a very fine scented Cape species, a free grower, with pretty foliage and good habit, deliciously lemon scented..... 0 50

NEW ZONALE and NOSEGAY GERANIUMS.

Audiffret Pasquier. Color rosy carmine, fine truss, large pip, neat, compact habit, a fine variety.....	\$1 00
Apple Blossom. A distinct and beautiful variety in the way of Reine Blanche, gigantic trusses of a pearly white, suffused with rosy pink, at the distance assuming the appearance of a huge mass of apple blossoms, which renders it particularly attractive in a house.....	0 50
Apollo. This is a noble flower; color brilliant rosy puce, shaded towards the edge of the petals with scarlet; the truss and pips are of the finest form.....	0 40
Adelina Patti. A charming variety, producing large trusses of splendid flowers of almost perfect circular form; color a beautiful rich dark cerise.....	0 40
Beauty of Wilts. Light orange scarlet, large truss and pip, very free bloomer, good bedder, new color.....	0 50
Ishop Simpson. A magnificent truss fully 9 inches in diameter, a grand variety.....	0 50
Renzi. Flowers soft, slightly tinted scarlet, trusses of good size and freely produced. As regards form and quality of flower, Renzi may claim precedence of any variety hitherto introduced; when well grown each pip exceeds two inches in diameter.....	0 30

	Each.
Rose of Allendale. A neat dwarf habited plant, producing noble trusses of a beautiful soft rose pink colored flowers, of good quality and form with a white marking upon the upper petals.....	0 30
Dreadnought. (Smith.) Rich peach blossom, large white eye, flower and truss extra large and fine.....	1 00
Dr. Peujade. Very large truss, pips large, fine crimson with white centre, a very showy variety.....	1 00
Etienne Marcel. Color, clear violet purple, grand trusses, a fine bedder and pot plant.....	1 00
Darkness. The darkest crimson ever seen in any Geranium yet sent out: its color being most intense, quite conspicuous amongst all others.....	0 30
Chatsworth Speed. Rich orange scarlet, suffused with purple, white eye, free flowering, good habit, presents a very rich appearance.....	0 40
Colonel d'Audlau. Deep rich crimson, truss immense; very showy, superb.....	0 40
Dazzler. Harry King and Jean Sisley have been very greatly admired for vivid color and large white eye. This variety far excels both. Eye very pure white and double the size; this, with the remainder of the flower the most dazzling scarlet, produces a very striking contrast, and renders it, when in good condition, one of the most attractive ever sent you.....	0 50
Fagus. A strikingly attractive flower of a very deep and extremely bright dazzling scarlet color, with a conspicuous white eye.....	0 50
General Pourcet. Deep rose-purple, approaching to violet. A superb variety.....	0 50
General Chanzy. Color a lovely clear violet, immense truss,—free bloomer, good habit, splendid bedder.....	1 00
Jealousy. A very distinct color, orange scarlet of a yellowish hue, and will be found a most distinct bedding variety.....	0 75
Gloire des Fontaines. Brilliant violet-rose, enormous trusses, 80 to 100 flowers on one footstalk; a noble variety.....	0 50
Hogarth. Of remarkable dwarf compact habit, producing large trusses of bloom; truss large and compact; flowers of good form and substance; color deep glowing crimson scarlet.....	0 50
King of the Bedders. Color almost identical with <i>Violet Hill Nosegay</i> ; salmon tinted with rosy-pink flowers, fine shape and substance; very dwarf, and stands the sun and rain better than any other variety.....	0 50
Martius. A magnificent flower, of immense size and substance, and of most showy and attractive rich rosy cerise color, with beautiful violet crimson shading.....	0 50
Mme. Baucharlet. Color an orange salmon striped with white, fine truss and good habit, a very distinct variety.....	1 00
Mrs. George Smith. Bright salmon; a very fine smooth flat flower, of beautiful form; a most abundant bloomer.....	0 30
Mrs. E. Groves. One of the finest Geraniums of the hybrid nosegay type; color bright magenta, slightly suffused with purple; throws immense trusses of fine form and substance; good habit.....	0 50
Mrs. G. Jennings. Is the admiration of all who have seen it; from the enormous trusses and conspicuous color, partakes of the hybrid nosegay class; dark magenta, suffused with purple, quite distinct, fine spreading habit and very floriferous.....	0 50
The Premier. Is compact and free in growth, and produces an abundance of fine bold massive trusses of bloom, which are thrown up well above the foliage; rich cerise scarlet.....	0 50
Princess Maud. This will undoubtedly become the favorite bedding Geranium of the season; it is a great improvement upon <i>Jean Sisley</i> , the color being a very bright and vivid scarlet; neat and compact habit.....	0 0
Sir Percyval Dyke. It has long been the desire to find a pure high colored pink, possessing a perfect shape and great substance. One has been found in this variety; it is of good habit, splendid shape, color very much higher than <i>Master Christine</i> , and far superior in every way.....	0 60

	Each.
Prince Charley. This has probably the largest pip of any <i>Geranium</i> yet sent out; color cerise scarlet, strong grower and very free.....	0 50
Santley. Very fine flower, produced in immense trusses; color a splendid soft orange scarlet, with large attractive white eye.....	0 50
The Garland. Recommended for its dwarf compact habit and profuse blooming properties; truss large and compact; flowers deep rose pink, the upper petals flamed with orange near the eye.....	0 50
The set of 33 for \$16.	

DR. DENNY'S NEW ZONALE GERANIUMS— Third Set.

- Agatha.** A strikingly pretty flower of magenta color, shot with blue, possessing the novel property of retaining its petals, until they wither on the truss, like the doubles, consequently its flowers continue in beauty much longer, and are unblemished by the shaking of carriage.
- Alonzo.** Very finely formed flower, of deep crimson color suffused with purple, distinct habit, robust and good.
- Aspasia.** Magnificent florists' flower of a perfectly novel color, resembling the Orchid named *Masdevallia Harryana*; the petals are both perfect in form and of great substance, and possess the property of persistency of petal to nearly as great an extent as *Agatha*. Dr. Denny considers *Aspasia* to be the most novel, and finest variety (not scarlet) he has raised.
- Brasidas.** A brilliant scarlet, with small white eye, of fine form and substance, truss large and stands erect over a neat zonate foliage, habit dwarf; a distinct variety.
- Eros.** A brilliant white eyed scarlet, a great advance upon *Jean Sisley*, in form of petal, in substance and depth of color, truss medium sized, habit good.
- Hebe.** A brilliant dark cherry-colored crimson, with bright golden anthers, which produce a rich and conspicuous effect, flowers of fine florists' form, truss large, habit good.
- Hetty.** A finely formed flower of a charming blue magenta color, perfectly novel and distinct, truss fair sized, habit dwarf and good.
- Imogen.** A fine florists' flower of a brilliant purple magenta color, changing to a deep bluish purple in the late autumn and early spring; the flower is of finer form and greater substance, truss full sized.
- Idalia.** A dark and distinct colored magenta, produces large trusses of good formed flowers, free and of good habit.
- Leila.** A florists' shaped flower, of a deep lilac color, tinged with blue. This variety somewhat resembles *Blue Belle* but far surpasses it in form of petal, substance, and depth of colors. Truss large, dwarf and bushy.
- Lurline.** An elegantly refined flower of a light purplish magenta color, truss medium size, habit rather slight and dwarf, foliage round and neat.
- Minerva.** A fine-formed thick-petaled deep maroon crimson, quite distinct, habit robust and good.
- Enone.** A brilliant orange scarlet with large white eye, the flower opens to perfect flatness, is finely formed and very large. Trusses of medium size, very freely produced, round dark green foliage, habit very compact.
- Snowden.** An attractive white variety, with large truss, which stands erect and well above an effective foliage, habit very dwarf and bushy.

Price of the above 50 cents each; the set of 14 for \$6 00.

NEW REGAL PELARGONIUMS.

This name is applied to that magnificent group of *Pelargoniums* the flowers of which are of large size, very rich and showy: a few are double, and although the others are not really double, yet from their fullness of form and the extra number of petals, they have the appearance of being so.

	Each.
*Alba plena (Lady Victoria Ker). Pure double white without spot.....	\$1 50
*Beauty of Oxtou. See Novelties.....	2 00
*Captain Rakes. See Novelties.....	0 75

	Each.
* <i>Elegantissimum</i> . A beautiful variety, with large crispy semi-double flowers, of a rich vermilion color, all the petals broadly margined with white.....	1 50
* <i>Madame Evrard</i> . A most attractive and distinct variety; the flowers are very full, with beautiful crispy petals of an exceedingly bright purplish crimson color, richly spotted with dark maroon.....	1 00
* <i>M. Ph. Zeller</i> . A distinct and showy variety, producing very large and full flowers, of a rich fiery crimson color, bordered with rose and spotted with very dark blackish red	1 50
* <i>Patria</i> . (Prince Arthur.) The upper and lower petals are a rich rosy carmine tint, the former equally marked with a rich crimson spot or blotch. The ground color is finely relieved by the pure light centre, and the margins bounded by a white line or border; the flowers having a tendency to produce above the average number of petals, resembling a double flower.....	1 00
* <i>Queen Victoria</i> . See NOVELTIES.....	0 75
* <i>Prince of Novelties</i> . This is a double flower, combining novelty and beauty, the usual upper and lower petals of unequal outline are transformed into a flat, circular ray of equalized petals, flower and truss large, the ground color is a brilliant carmine tinted crimson, with a bluish white margin, each petal being marked at the base with a rich dark crimson blotch.....	0 75
* <i>Theophrasta</i> . A very beautiful <i>Pelargonium</i> , flowers double purple, freely produced; a very desirable variety.....	0 75
* <i>Ville de Caen</i> . A very novel variety, of a scarlet maroon color; very large pips; fine addition to this class.	1 50

PELARGONIUMS.—New Varieties with Fringed and Striped Petals.

* <i>Empress of India</i> . This is a beautiful and greatly improved variety, in the style of the well-known <i>Empress of Pelargoniums</i> , one of the most elegantly crimped, in the style of <i>Dr. André</i> ; pure white, the upper petals marked with a rich violet-crimson spot.....	1 50
* <i>Empress</i> . (Empeur de <i>Pelargoniums</i> .) Pure white, upper petals marked with violet-rose, elegantly fringed	1 00
<i>Grandis</i> . Habit compact and free, profuse bloomer, flowers pure white, without spot, suitable for bouquets.....	0 60
<i>Hebe the Beautiful</i> . Color fine cinnabar scarlet dark blotch, and elegantly frilled petals, a vigorous and compact grower and profuse bloomer, admirable for forcing or early spring blooming, one of the best for florists, so lovely and distinct.....	0 75
<i>Lapis Lazuli</i> . Another of those beautiful frilled French <i>Pelargoniums</i> ; color bluish white, with scarlet belted blotched, elegantly frilled like <i>Dr. André</i> , equally beautifully with the others described, neat habit, early and profuse bloomer.....	0 75
* <i>Marie Lemoine</i> . A very beautiful variety, large truss and flower, color white, beautifully fringed; a grand variety	1 50
<i>Memorandum</i> . White, finely reticulated with rich plum-colored lines, very distinct	0 60
<i>Prince of Pelargoniums</i> . This most beautiful variety resembles, in its style of flower, the well-known <i>Dr. André</i> , by its elegantly fringed margin and equally large flowers, but greatly exceeds it in effect in being a brilliant vermilion-scarlet ground color, finely relieved by a bluish white centre with violet veins, and flushed with rich crimson on the upper flower lobes, producing its flowers in great profusion....	0 75
* <i>Princess of Wales</i> . A very handsome early flowering variety with elegant frilled petal margins, in the style of <i>Dr. André</i> , free and compact in growth, with a well branched habit; flower trusses large size, and borne in profusion well above the foliage; ground color pure bluish, each petal alike marked with a rich dark velvet crimson-scarlet margined blotch. This will prove one of the most popular, as it is unquestionably one of the most beautiful flowers ever raised.....	1 00

Each.

- **Star of the East*. This plant forms a very neat and fine variety, resembling the *Princess of Wales*; it is equally free and compact in growth, with an equal profusion of bloom, but with larger flowers, of pure white ground; the petals are elegantly fringed, the upper ones marked with a rich crimson spot, and the under ones elegantly pencilled with violet-colored lines. 1 00
- **Pelargonium Striata Elegans*. This is one of the large flowered exhibition group of *Pelargoniums*. The flowers are a magenta-rose being flaked or barred with elegant blue-mauve, the top petals having a black feather-like plume. The previous striped flowered varieties in this group were distinguished by white bars upon a rosy-red ground. The one now offered is unique in its combination of color. (Ready in April.) 2 00
- Dr. André*. Flowers blush pink ground, the margins of the petals elegantly fringed, quite unique, a lovely plant for pot culture. Florists should grow this extensively. 0 50
- Crispiflora*. White, with rose blotches shaded lilac and blue, and beautifully fringed, a lovely variety in the style of *Dr. André*, early and profuse bloomer, fine habit, quite a florist's plant. 0 60
- **Triomphe de St. Maude*. See Novelties. 1 00
- **Candide*. Flowers white, striped and flaked with amaranth, an extremely beautiful flower. 1 50
- **Fantaisie*. Flowers very large, white, blotched and veined with carmine, fine habit and free bloomer, a lovely variety. 2 00
- **Junon*. A grand flower, large and striking, color white, blotched with rosy carmine, a very beautiful *Pelargonium*. 2 00
- **Le Democrate*. This fine variety has large flowers and trusses, color carmine margined with white, and blotched with maroon—extra fine. 1 50
- **Le 20 Fevrier*. In the style of that lovely flower *Prince of Pelargoniums*, color brilliant orange vermilion, blotched with maroon on upper petals, lower petals light color, a magnificent variety. 2 00
- **Manifestation*. Large flower, ground color white, reticulated with crimson, vigorous compact plant, a most distinct variety, extra fine. 2 00
- **Reveil de la France*. Flowers of the purest white spotted with rosy carmine, a delicately beautiful variety, will be largely grown. 2 50
- **Triomphe*. A very showy flower, vivid carmine with a maroon blotch, and marbled, a free grower and bloomer, a very attractive flower. 2 50

The last nine varieties are recent importations and will not be ready before end of April.

NEW SHOW PELARGONIUMS.

- **Captain Cook*. Very large umbels, of a rich orange carmine, centre lilac white, upper petals lightly blotched, a very fine variety. 1 50
- **Copernic*. Flowers flesh white, upper petals blotched with purple carmine, lower petals blotched and reticulated with crimson. 1 50
- **Gloria Patriæ*. Ground color white, blotched with light maroon, of perfect form, a variety of great merit. 1 50
- **Istmo di Suez*. A flower of great effect, fiery orange with rose centre, upper petals blotched with fiery maroon, surrounded fiery orange, superb. 1 50
- **Jean Bart*. Vermilion purple, centre white, upper petals blotched with maroon, and edged with white, beautiful. 1 50
- **Mad. Vibert*. Fine black maroon blotches, bordered fiery red, the flower entirely edged with rose. 1 50
- **Malvæflorum*. Flower large mallow-form, fine lilac, with fine light lively rose blotches, very large umbels, very fine, a grand variety. 1 50

The last seven varieties are recent importations, and will not be ready before end of April.

*DORYANTHES PALMERI.—*Queen's Land Lily.*

A highly ornamental flowered and graceful habited evergreen Greenhouse Plant, its style of intermediate between the *Yucca* and *Dracæna*, forming a stemless bulbiform rootstock, from the summit of which the rich emerald-green leaves form a large radiating crown, each broadly lanceolate or sword-shaped, glabrous and undulate; towards mature growth they form an elegantly arched or decurved outline. The flower-scape rises from the centre, 8 feet in length, forming a densely clothed pyramidal compound racemes, much like those seen in various *Yucca* species. Flowers numerous, approaching in size and form to those of the well-known *Vallota purpurea*, from three to four inches in diameter, of a rich pæony-crimson hue, with a white centre. Each blossom is accompanied with leaf bracts of an equally rich color as the flower. \$1 to \$2 each.

*ARALIA VEITCHII.

A very elegant plant from the South Sea Islands, producing very narrow digitate leaves, considerably undulated; upper surface deep green, under dark crimson. One of the most beautiful decorative plants in cultivation. \$2 each.

*ARALIA GUILFOYLEI.

The bold pinnate leaves are made up of from three to seven stalked oblong-elliptic bluntish leaflets; these leaflets vary in size from two to three inches long, and are neatly and evenly margined with creamy white, the surface being in addition occasionally splashed with gray. It has been awarded a First Class Certificate by the Royal Horticultural Society. A fine and distinct ornamental stove plant. \$1.00 each.

*TABERNAMONTANA CAMASSA.

(Growers of Flowers for Market, should cultivate a house of this plant alone.)

A very desirable and newly introduced evergreen Stove shrub of a neat compact dwarf habit, with medium small glossy bright green laurel-like leaves, and terminal axillary cymose racemes of double white flowers of Gardenia-like outline and fragrance which are produced on the point of every shoot. From Gardenia it differs in its easier growth, and in requiring a much less stimulating atmosphere to produce its bloom, the usual temperature of a hot-house with less humidity, will produce blooms more freely and longer in succession. The petals of the flowers are lighter and more elegantly arranged than the Gardenia, and not quite so large; small plants in 60 pots will produce flowers freely. \$2 each. (Ready in May.)

*FICUS PARCELII.

A splendid decorative plant with beautifully variegated foliage. The leaves, which are of large size, thin texture and coarsely serrated on the margins, are of a bright green color, profusely but irregularly blotched with creamy white and dark green. The plant is of free growth and extremely effective. \$1 each.

*PYRUS MAULEI.

This desirable new fruit has been introduced into England from Japan; it is allied to the Japan Quince. The fruit is the size of a moderate Quince, of a bright apricot-color, and makes a rich conserve. The flowers, which are produced in great profusion, are of a most brilliant orange scarlet color. It is one of the most beautiful flowering trees of recent introduction, as well as a valuable fruit. Small plants in pots \$1.50 each.

*GREYA SUTHERLANDI.

A beautiful and distinct South-African plant, with foliage similar to a Pelargonium; flowers very showy. A really fine and distinct new plant. \$1.50 each.

***APHELANDRA FASCINATOR.**

A very fine species, with very ornamental foliage as well as magnificent flowers; the leaves are rich dark green, beautifully banded with silvery white, and underneath of an uniform purplish violet; the spikes of bloom are very large and of dazzling vermilion color. \$1.50 each.

ANTHURIUM CRYSTALLINUM.

This beautiful species is certainly one of the finest introductions of late years. It produces large, cordate, acute leaves, of a leathery consistence. The emerald green refulgent leaves are spotted all over with a brighter shade, and bordered by a broad silvery or rather crystal band, which surrounds the intra-marginal and four secondary nerves. These dazzling white zones are so distinct and regular that they resemble a border of incrustated silver around the sections of the blade of the leaf. The effect of this highly ornamental plant is most striking. The young leaves are of a violet purple, forming a marked contrast with the older, deep green leaves, divided into squares by silvery bands as we have just described. \$2 50 each. (Ready in May.)

***ANTHURIUM REGALE.**

This superb ornamental foliage plant is well deserving a place in every collection. There are several varieties of this plant. The one now offered is the finest; the leaves are heart-shaped, much lengthened out towards the apex, and rich dark velvety-green in color. \$1.50 each.

ANTHURIUM MAGNIFICUM—(Grandis.)

The foliage of this plant is truly magnificent, a noble species, with large velvety green leaves and broad silver veins. 75 cts. each.

***ANTHURIUM SCHERZERIANUM.**

One of the most striking and beautiful dwarf-flowering stove plants of recent introduction, producing beautiful brilliant scarlet flowers, each of which remains from two to three months in bloom. This charming and novel plant is easy of culture, and a most abundant bloomer. \$2 each.

***PHILODENDRON LINDENIANUM.**

This Philodendron has heart-shaped leaves of a delicate satiny green, shaded with metallic olive color on the upper surface, the under part pale green, ornamented with bands of maroon. The young leaves are of a bright chamois color, and the maroon bands of the under parts penetrate through to the upper, so that the coloring of the plants has a glistening and indescribable effect. \$1 each.

***CYANOPHYLLUM SPECTANDUM.**

A grand plant with large velvety leaves, and whitish ribs which grow to an immense size and are very attractive. \$1 each.

***SPHÆROGYNE LATIFOLIA.**

A plant with the grandest possible foliage, large, broad and flat, deep green on top, under side cinnamon brown; very hairy leaves and stems; a grand specimen plant. One of the most attractive for exhibition. \$2 each.

***POSOQUERIA LONGIFOLIA.**

This plant forms an elegant bush, and is very free flowering. Leaves large, somewhat ovate, coriaceous and shining green; flowers tubular, pure white,

produced in large corymbs of a dozen and more, waxy like, from 3 to 4 inches long, and deliciously fragrant. It is a beautiful plant. \$1.50 each.

PAULINIA THALICTRIFOLIA.

A very beautiful semi-scandent stove foliage plant, which will be most useful for all kinds of decorative purposes. It is of a slender growth, producing very freely its beautifully cut leaves, which resemble the fronds of a highly divided Maiden-hair Fern. The matured leaves are of a striking bright green, the young shoots and foliage being of a beautiful rosy tint. The plant may be grown either on a trellis or in bush form, and as such is a very great acquisition both as a plant for table decoration or to cut from. \$1 each

*ALOCASIA INTERMEDIA.

This is a beautiful garden hybrid; leaves the same shape as those of *A. Veitchii*, but very much larger, the footstalks are prettily mottled. It is of very free growth, and retains its leaves a long time. Makes a very beautiful and striking specimen plant. \$2 each.

ALOCASIA MACRORHIZA VARIEGATA.

Leaves nearly as large as *Colocasia Esculentum*, broadly splashed with white. Some leaves nearly all white. For easy growth, combined with the rich variegation, makes it a very telling subject for exhibition. 50 cts. to \$1 each.

ALOCASIA ILLUSTRIS. (*Gibsonii*.)

A free-growing bold-habited perennial, intermediate in its general aspect between *Alocasia* and *Caladium*. The leaf-stalks are erect, and have a brownish purple tint, color a rich green, marked between the principal veins by broad patches of blackish-olive, and forming a striking contrast with the brighter green portions of the leaf surface. It is somewhat in the way of *A. Jenningsii*, but is of much larger and more vigorous growth. 50 cts. each.

*ALOCASIA SEDENI.

"A very beautiful hybrid, between *A. Metallica* and *A. Lowii*. The form of the leaf is perfectly intermediate between the two parents, whilst the coloring is a very striking and pleasing combination of the metallic hue of the one parent, with the dark green and prominent white veins of the other. As a fine foliage plant, we consider it decidedly superior to both parents, and in all respects worthy of a place in the most select collections." \$2 each.

ALOCASIA ZEBRINA.

Fine yellow leaf-stalk, with distinct black marks, rendering it a very conspicuous plant. It makes a grand specimen. \$1 each.

ALOCASIA METALLICA.

A plant possessed of great beauty. Large thick shell-like leaves of a bronzy copper color. It is distinct and admirable in every respect. \$1.

ERIOCNEMA MARMOREUM.

Plant dwarf, with habit of some of the Begonias, leaves green, striped with broad bands of white; a beautiful plant. 75 cts. each.

SONERILA MARGARITACEA.

A small plant, with bright green leaves dotted all over with white spots—a gem. 75 cts. each.

CAMPSIDIUM FILICIFOLIUM.

A free-growing slender woody climber, from the Fiji Islands. It has opposite imparipinnate leaves, which are about 5 inches long. The leaves, from their size and form, are strongly suggestive of fronds of some small-growing pinnate *Asplenium*. The growth and general character of the plant is so elegant that whether cultivated as a small pot plant, trained on globular or other trellises, or planted as a climber, it has a most charming and engaging appearance. 50 cts. each.

BLANDFORDIA CUNNINGHAMI.

Dr. Lindley, in describing the previously known species of this tribe, thus refers to *Blandfordia Cunninghami*: "None of these are, however, to be compared for beauty with a plant of which the late Allen Cunningham gave me a specimen, the flowers of which are fully twice as large as *B. marginata* (*grandiflora*.) The flowers are of a more deep rich tint, except at the end of the petals which are yellow." \$1.50 each.

MACKAYA BELLA.

This most beautiful plant is a native of Natal. It is a tall, slender shrub, with virgate branches. The flowers have a pale lilac corolla, nearly two inches long, the throat ornamented with most delicately pencilled reticulated purple veins, tubular below, campanulate. The plant is very floriferous, and when in full bloom, appears a mass of most delicate, pendant, campanulate flowers. A charming plant. 60 cts. each.

*ABUTILON SELLOWIANUM MARMORATUM.

The leaves of this beautiful variety are very large and ornamental; their color is a golden yellow, richly tessellated with green. It is an extremely attractive variegated foliage plant. \$2 each.

ABUTILON DARWINII.

The flowers of this beautiful abutilon are orange scarlet veined with pink, opening like a parasol, making it distinct from any of the family, all of which are bell-shaped, a profuse bloomer, a very desirable plant. 50 cts. each.

SALVIA NIGRESCENS.

Nigrescens, long flower spikes, gracefully decurved or drooping, of a blackish violet and lavender colored calyx. \$1 each.

SALVIA BOLIVIENSIS VERTICILLATA.

Another beautiful *Salvia* which blooms freely during the winter and spring months, flowers in terminal and axillary flower-spikes, eight to ten inches long, of rich glossy scarlet flower tubes. 75 cts. each.

*HYPERICUM PATULUM.

A beautiful hardy Japanese plant, of robust bushy growth, with bright green persistent leaves; it is very free-flowering, producing abundant terminal clusters of rich yellow blossoms, and is an extremely attractive hardy shrub. \$1 each. (Ready in April.)

*CANTUA CORYMBIFLORA.

A pretty greenhouse plant the flowers are borne in terminal corymbose trusses, trumpet shaped and pure white. \$1 each.

FUCHSIA RACEMOSA.

A very distinct species, collected by Thos. Hogg in St. Domingo. "It grows not over 18 inches high, forming a round bush every shoot being terminated with a raceme of orange scarlet wax-like flowers" \$1.50 each.

*FUCHSIA BOLIVIANA.

A remarkably ornamental and attractive species, discovered by M. Roezl in Bolivia. It is of compact growth, and its branches terminate in large bunches of beautiful drooping flowers, about 3 inches long and of a rich carmine crimson color, with bright carmine corolla. Its bushy free-blooming habit renders it extremely useful and effective. \$1 each.

FUCHSIA PROCUMBENS.

A very slender trailing habited plant. By its small roundish leaves, it is so dissimilar to its allied forms as to give at first sight the impression of a small species of Moneywort (*Lysimachia*) the small flowers are borne snugly in each axil, orange yellow. A fine basket plant. 25 cts. each.

*GYNERIUM ARGENTEUM—ALBA VARIEGATA—*White Variegated Pampas Grass.*

*GYNERIUM ARGENTEUM—AUREA VARIEGATA—*Gold Variegated Pampas Grass.*

Both are beautiful variegated varieties of the well known graceful Pampas Grass. \$1 each.

*EULALIA JAPONICA ZEBRINA.—ZEBRA VARIEGATED.—*J. Grass.*

The variegation in this lovely grass, is across the leaf instead of longitudinally. It grows from 4 to 5 feet in height, is a most strikingly graceful plant. Its flower spikes is equally beautiful and valuable as *E. Japonica*. \$1 to \$3 each.

EULALIA JAPONICA VARIEGATA—*Japanese Variegated Grass.*

Is a perennial hardy species from Japan, with long variegated leaves. The flower stems are from 3 to 4 feet high, very reed-like, and produce loose panicles of flowers; these panicles are hairy and erect until dried, when they become elegantly curled, closely resembling Ich-dien feathers. It is a remarkably elegant species. 30 cts. each.

*XANTHOCERAS SORBIFOLIUM.

This is one of the most beautiful hardy shrubs which have been introduced for years. It is a native of central China. It is a shrub or small tree, not attaining over 10 or 12 feet in height and bushy. The flowers expand during April at the same time as the leaves, and are disposed in racemes which attain a height of eight inches, and sometimes more. They are five petalled, color white, having a slight fleshy tint and reddish copper colored at the base, shading off to a purple violet. This lovely shrub is perfectly hardy—my specimen plant having stood out unprotected the past three winters, without sustaining the least injury. \$2.50 each. (Ready in May.)

NEW VARIETIES OF HIBISCUS ROSA SINENSIS.

Cruentus. The flowers are of a moderate size, compact and double, of a remarkably rich crimson red, and having a strikingly showy character, the color being rich.....\$0 50

Each.

Each.

IMATOPHYLLUM MINIATUM.

Each.

- A very excellent evergreen, warm greenhouse or cool stove plant, intermediate between *Clivia* and *Vallota* or *Amaryllis* in style of growth, with dark green leaves, and large corymbs of erect, large, clear rich salmon or light flame colored cup-like blossoms..... 1 00

LASIANDRA MACRANTHA FLORIBUNDA.

- A magnificent plant of good habit, and a most profuse bloomer; the flowers are rich violet blue, between five and six inches in diameter, and produced nearly all the year through. It requires the same treatment as *Pleroma Elegans*, but it is superior to that plant both in habit and size of its flowers. A truly charming plant..... 0 50

STEPHANOTHUS FLORIBUNDA.

- This plant is not new, but as a valuable stove climber it is unequalled. The flowers are pure white, of a waxy texture, very persistent. Some large plants in one of my greenhouses were covered with bloom the whole of the past spring and summer. Florists should grow it extensively50 cts. to 1 00

DIPLADENIA (*Echites*.)

- Amæna. Flowers of a soft pink color, suffused with rose, somewhat resembling *D. Splendens*, but in every respect a great improvement on that variety, being of superior form, the lobes being stiff and round instead of reflex and pointed. For summer blooming in the greenhouse, no climber is more lovely than this..... 0 75
- *Amabilis. Flowers very large, deep crimson; extra superb..... 1 00

*OTHERA JAPONICA.

- A very fine hardy evergreen from Japan, which has proved quite hardy in our nursery..... 1 50

*TECOMA STANS.

- A very fine plant from south-western Texas, has succeeded finely bedded out with us during summer; the flowers are a rich yellow, and very floriferous 1 50

CYCLAMEN PERSICUM.

- Cyclamen Persicum. These have been raised from the finest strain, and embraces many new and beautiful varieties. As a winter blooming plant, it is invaluable..... 0 50

CYCLAMER PERSICUM GIGANTEUM.

- A large and very fine variety of Persicum..... 0 75

BLETIA TANKERVILLÆ.

- A beautiful terrestrial Orchid of free growth; the flower stems are about 18 inches high, color white and brown; the flowers are singularly beautiful..... 0 50

CYPRIPEDIUM.—Lady's Slipper.

Each.

Insigne. This lovely plant is a native of Silhet, and can be cultivated in a warm greenhouse; flowers freely.....	0 60
Venustum. Another fine species, beautifully marked foliage.....	1 00

ANTIGONON LEPTOTUS.

A beautiful plant, of climbing habit, with numerous racemes of rose-colored flowers, showing a still richer tint in the centre. The profusion of its bloom is such as to give the resemblance of Roses at a distance, hence one of the Mexican name is " <i>Rosa de Montana</i> ," or Mountain Rose. Described by its discoverer as the most beautiful climber he had ever beheld.....	0 50
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

MANETTIA CORDATA.

A climbing plant, which succeeds admirably bedded out during summer. The flowers are orange scarlet, and given in the greatest profusion....	0 25
----------------------------------------------------------------------------------------------------------------------------------------------	------

TABERNÆMONTANA CAMELLIFLORA PLENO.

This plant is not new, but it is not cultivated to the extent it deserves; it succeeds well bedded out during summer, giving its lovely double fragrant flowers of the purest white in great profusion, excellent for bouquets, &c.....	0 50
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

JASMINUM.

Duchess d'Orleans. Flowers double, white like miniature, white roses, deliciously fragrant, a very valuable plant.....	0 50
Grand Duke. Flowers double, white like miniature, white roses, deliciously fragrant, similar to the above, but distinct.....	0 50
Grand Duchesse de Tuscany. Flowers double, white like miniature roses, deliciously fragrant, in the style of the two preceding; very fine.....	0 75
Trifoliata. Another fine variety, flowers white like miniature roses, deliciously fragrant.....	1 00

No plants can be more beautiful or fragrant than those blooming freely through the summer. All who grow choice plants should possess them.

EUPHARIS.—Amazonian Lily.

Amazonica. Large pure white fragrant flowers, full four inches in diameter, and are produced in abundance on strong plants.....	25 cts. to 0 75
Candida. A fine species; flowers large, pure white, very fragrant.....	0 75
Grandiflora. Large, pure white, very fragrant.....	1 00

CRASSULA.

Lactea. A very beautiful winter flowering plant of easy culture, flowers freely, color pure white. For cultivating in windows few plants succeed as well as this. It is one of the very best plants for this purpose.	0 25
Cordata. Another fine species for winter blooming; color pure white, of free growth, and profuse flowerer.....	0 25

CALLICARPA PURPUREA.

A pretty compact growing greenhouse plant of easy cultivation. The flowers are small, but are succeeded with purple berries, which are very attractive.....	0 50
-------------------------------------------------------------------------------------------------------------------------------------------------------------	------

STOKESIA CYANUS.

Each.
A very fine native perennial, with deep sky blue flowers; perfectly hardy. 0 50

ARUNDO.

Donax Variegata. This is the most stately and graceful of all known variegated grasses of the garden. It forms a robust plant of majestic habit, with long, broad, elegant leaves, $1\frac{1}{2}$ to 3 feet in length, marked with broad silver stripes or margins their whole length..... 0 25
Conspicua. This a magnificent grass from New Zealand, fully equal to Pampas Grass, and quite hardy..... 0 50

SPIRÆA JAPONICA AUREA VARIEGATA.

A hardy herbaceous perennial, with glossy red tinted stems, and triply three-lobed green leaflets, richly traced throughout with gold-colored veins. The flowers are produced in large, erect, densely-flowered, snow-white, plume-like racemes..... 0 50

IRIS KEMPFERI.

This very fine Iris is from Japan; it is a free growing plant, and a free bloomer, fine..... 0 50

AMORPHOPHALLUS RIVIERI.

This very curious Aroideæ will make a striking figure in our gardens; planted in the open ground, in April-May (like the Dahlias) the tubers will produce on a thick stem, a very extraordinary looking palmated single leaf, in the shape of a reversed umbrella. The whole plant is of a dark green; the stems and nerves of the leaf are irregularly spotted with white..... 0 30

NEW AND SCARCE TEA-SCENTED ROSES.

Catalogue of Roses mailed on application.

- *Duchess of Edinburgh. (*Colored Plate in 1876*) This extraordinary novelty among Tea Roses has been sent out by Messrs. Veitch & Sons, London, England. The color is a deep glowing crimson, a color unknown hitherto in this class, very free flowering, and as good a bedding variety as the crimson China. The flowers are large, full, fine form and substance. After growing this Rose two years we can recommend it with perfect confidence. To florists who grow winter Rose-buds, it will prove invaluable, having a vigorous constitution, profusion of bloom, richness of color and delicious fragrance to recommend it. In 3 in. pots, 40 cents; strong..... 0 75
*Perle des Jardins. Deep canary yellow, very large, double flowers in peduncles, very vigorous. In Europe this fine flower is considered a formidable rival of Marechal Niel. The finest of yellow Roses. Superb. In 3 inch pots, 30 cts; strong..... 0 50
*Perle de Lyon. This is one of the finest yellow Tea Roses in cultivation, color a deep golden yellow, large double, and of fine form; a very vigorous grower with strong branches. In 3 in. pots, 30 cts.; strong, 0 50

	Each.
Rosa Rugosa Alba. Flowers in large terminal clusters, about 3 inches in diameter, consisting of five petals, which are pure white. It forms a neat compact bush, and is very useful and effective.....	0 50
R. Rugosa Rubra. The flowers of this variety are a bright rosy crimson,	0 50

PRICE OF ROSES FOR SPRING 1877.

The Roses we offer this spring are strong, well established plants in 3-4-5 and 6 inch pots. Plants such as those when planted give immediate effect, and there are no losses.—See *New Rose Catalogue*.

- *New Hybrid Perpetual Roses of 1876. 50 cents each, \$5 per dozen.
- *New Tea Scented, &c., of 1876. In 3 inch pots, 50 cents each, \$5 per dozen.
- *New and Scarce Roses. 50 cents each, \$5 per dozen.
- *General Collection. Purchaser's selection, strong in 5 inch pots, 30 cents each, \$3 per dozen, (by Express.) Our selection, 25 cents each, \$2 per dozen, (by Express.)
- *General Collection. Purchaser's selection, smaller, but nice plants, 25 cents each, \$2 per dozen, \$12 per 100. Our selection, 20 cents each, \$1.50 per dozen, \$10 per 100. (By mail or express)
- *General Collection. 3 inch pots, 20 cents each, \$1.50 per dozen, \$8 per 100. (By mail or express.)

ALOCACIA.

	Each.
Alba Violacea. Stems blue, striped white; large foliage.....	0 30
Marshalli. The leaves are a bright green, marked between the principal veins with broad wedge-shaped blotches of blackish purple.....	0 30
Jenningsii. A delicate green, over which, between the principal veins are laid heavy blotches of black, which are remarkably precise in outline and arrangement.....	0 30

NEW and SCARCE CANNAS.

*Bonnetti Excelsa, (new.) A fine robust variety with grand foliage, flowers reddish purple.....	0 75
*Ernest Benary, (new.) A very striking and beautiful novelty, large foliage, free bloomer, fine.....	0 75
*Premices de Niece, (new.) Foliage, broad and fine, plant fine habit, a grand bedding sort.....	0 75
*Superb, (new.) Large broad and fine foliage, free bloomer, flowers crimson scarlet.....	0 50
Henri Vilmorin. Large dark green leaves, brilliant orange blossoms; leaves stand well in exposed situations. This is a very fine plant.....	0 30
Merechal Vaillant. Large orange flowers, a fine, vigorous grower with large leaves of a dark bronze-crimson.....	0 25
Musæfolia Sanguinea. Highly ornamental variety, having broad and stately Muse-like leaves, prominently ribbed or nerved, and of a rich bronze or chocolate and crimson tint. As portable single specimens for temporary designs, it forms a very beautiful and telling effect in contrast with the massive groups of miscellaneous plants in the same order	0 30
Prince Imperial. Fine rich crimson flowers, very free flower; a grand plant.....	0 30
Oriflamme. Leaves large lanceolate-green, with violet veins, a vigorous showy plant, with salmon orange flowers.....	0 25
Tricolor. The stems, and also leaf margins, are tinted with red, making an elegant contrast to the general effect of the foliage, which is densely streaked and mottled with cream white.....	0 25

NEW TUBEROUS-ROOTED BEGONIAS.—Single Flowered.

The following novel and beautiful varieties will be found admirably adapted for the summer and autumn decoration of the greenhouse and conservatory; for they produce in the utmost profusion magnificent flowers of very large size, and great variety in color. They do not require stove cultivation, but will succeed well in a greenhouse. The tubers rest during the winter months, similar to Gloxinias, and can be easily re-started into growth in the spring. Their profuse flowering quality, and the charming variety of color of their blossoms, render them extremely showy and effective.

	Each.
*FREBELII. A splendid new species from Ecuador, very distinct and attractive, producing, well above the foliage, erect bunches of large brilliant scarlet flowers; the foliage is of a bright green color, furnished on the under side with a thick covering of white hairs.....	1 00
*Emeraude. Very lively carmine, the centre of the flower striped with pure white, flower very large, measuring two inches. A first class plant.....	1 00
*Onyx. Flower very large, vermilion, shaded with very lively orange, reminding of the color of <i>B. Veitchii</i> . It is a very fine and free-flowering variety.....	1 00
*Intermedia. A very grand variety, with large brilliant scarlet flowers..	1 00
*Coral Rose. Brilliant rose shaded carmine, very large full open flower, beautiful.....	1 00
*Rosaflorea Superba. Very beautiful large rose-colored flowers, very fine,	1 00
*White Queen. A very elegant variety with numerous racemes of ivory white blossoms, an exquisite flower.....	1 00
*Rubis. Habit and foliage of <i>Begonia Sedeni</i> , flower of a beautiful tender rose, well open and of good form; very free flowering.....	1 00
*Model. Flower very large, of a beautiful rose color, fine bloomer and habit, a lovely variety.....	1 50
Sutherlandii. Flowers yellow, distinct and fine.....	0 50
Vesuvius. A fine variety, producing very large flowers of a rich orange scarlet, superb.....	1 00
Fannie E. Saul. This beautiful new variety, which originated in our establishment, is of the type of <i>Sedeni</i> . The flowers are large, of a brilliant amaranth, of free growth and profuse bloomer.....	0 75
Rosea Alba. Of neat dwarf habit, with numerous terminal projecting racemes of white blossoms, suffused with rose, a distinct and pleasing variety.....	0 50
Chambersii. A hybrid between <i>B. Pearcei</i> and <i>B. Sedeni</i> , the flowers are freely produced, large rosy salmon inside, pink without.....	0 50
Agate. A lovely hybrid raised from <i>Boliviensis</i> ; a free grower and profuse bloomer; color vermilion orange.....	0 50
Topaze. A cross between <i>B. Veitchii</i> and <i>Boliviensis</i> ; color bright vermilion, very distinct and beautiful.....	0 50
Chicago. The flowers are of a glossy salmon red color, averaging more than 2 inches in diameter, and produced very freely.....	0 50
Carminata. Flowers large rosy salmon, the male blooms being upwards of an inch long. It is a remarkably free bloomer.....	0 50
Chelsoni. An elegant hybrid; it is of good compact habit, flowers large, drooping, bright orange, shaded with red.....	0 40
Pearcei. The foliage is very pretty colored, flowers yellow, distinct and fine, a bulbous rooted species from South America, and very distinct..	0 50
Boliviensis. The flowers are produced in great abundance, pendulous, somewhat bell-shaped, and bright shining red in color.....	0 30
Sedeni. This is a cross with <i>Boliviensis</i> , but larger leaves. The flowers are of the richest Magenta color, and of large size.....	0 30
*Veitchii. It differs in all respects from any other Begonia yet known, in having immense roundish blooms of a vivid vermilion or cinnabar red, and in being comparatively hardy.....	1 00

NEW TUBEROUS-ROOTED BEGONIAS.—Double Flowered.

	Each.
*Glorie de Nancy. A magnificent variety, with large very double beautifully colored carmine flowers. The plant is of erect growth and very floriferous.....	5 00
*Balsaminæflora. An exceedingly beautiful full double flower like a double Balsam, color orange red, fine floriferous habit.....	3 00
*Leomeini. The flowers of this beautiful plant are like a double Anemone, of an orange vermillion, very fine.....	2 50
*Salmonæ plena. Flowers of a pleasing shade of deep rosy salmon, fine habit and profuse bloomer, <i>very distinct</i> , fine.....	2 50

The above four double varieties are recent importations, and will not be ready till May.

BEGONIA GLAUCOPHYLLA SCANDENS.—Climbing Begonia.

A beautiful climbing species, admirable for hanging baskets: free grower and profuse bloomer.....	0 30
---------------------------------------------------------------------------------------------------	------

BEGONIA COCCINEA.

A very beautiful species of shrubby or bush-like growth, forming a grand plant for the greenhouse or window, a free bloomer, color bright scarlet, a fine plant	0 50
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

IXORAS.

Amabilis. Of vigorous and compact habit, deep orange salmon, well formed flowers, borne in large trusses, which are produced in great profusion.....	1 00
*Colei. A cross between <i>I. Coccinea</i> and <i>I. Alba</i> , having the strong free robust habit and large foliage of the former, and the pure white flowers of the latter.....	1 00
*Williamsii. It is a free-growing plant and an abundant bloomer, producing immense trusses of large flowers, of a very distinct and pleasing shade of reddish salmon. It is one of the very best varieties in cultivation,	2 00
Coccinea Superba. Deep scarlet.....	0 50
Crocata. Rich orange red.....	0 40
Griffithii. Orange crimson.....	1 00

These plants are exceedingly beautiful; they require warm stove heat, and whoever has facilities for growing tropical plants should not overlook *Ixoras*.

DOUBLE CHINESE PRIMROSE —*Primula Sinensis pleno*.

MRS. JOHN SAUL.

This superb variety was raised in our establishment. The flowers are large, pure white, petals over-lapping, beautifully serrated, of fine form, robust and compact habit, profuse bloomer. Can be safely recommended as the best double white <i>Primula</i> out	1 00
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

The well-known horticultural writer, F. R. Elliott, Esq., of Cleveland, Ohio, says of it: "A few days since, visiting the greenhouse of Mr. Oliver Alger, we saw, for the first time in bloom, the new double Chinese Primrose, 'Mrs. John Saul.' It is usual for originators of new plants or fruits to praise them all they will maintain, but in this case the originator, John Saul, of Washington, D. C., has, in his description of this new flower, told only a plain tale, when saying, 'it is the best double white primrose out.' It is an abundant bloomer, with large flowers of pure white, very double, the petals over-lapping and beautifully serrated—all in all, the finest variety we ever saw."

*PRIMULA, MARY C. SAUL.—*New Double White.*

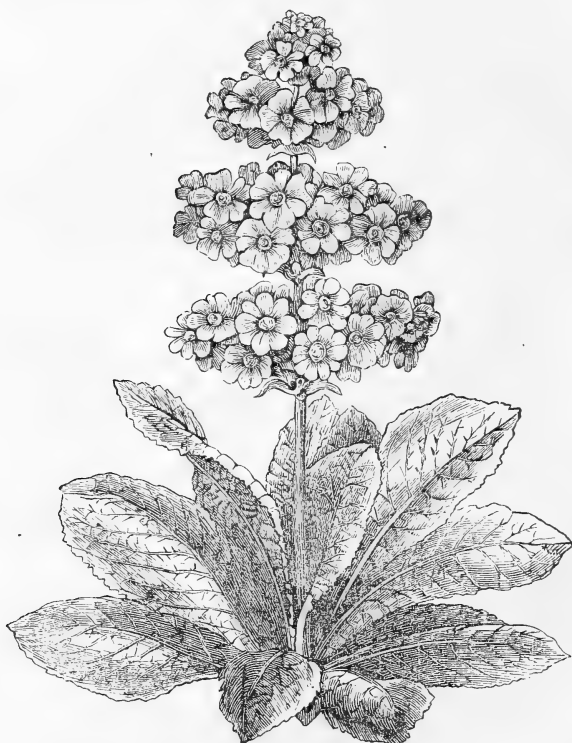

Each.

A seedling raised in our establishment, the flowers are as large as a carnation, very double, of the purest white, habit strong and vigorous; the finest white Primula ever raised..... 2 50

*PRIMULA, FANNIE F. SAUL.

Another of our seedlings, a counterpart in every particular of the last, except that the beautiful white blooms are occasionally flaked with vermillion, a magnificent flower..... 2 50

We recommend these beautiful Primulas to our patrons, believing they are unequalled by any others in cultivation. Their merits are well known to the Florists of Baltimore and Washington.

PRIMULA JAPONICA—Queen of Primroses.

Each.

This beautiful Primula has been cultivated by us since its introduction, with great success. It is perfectly hardy, and will flower freely in the open border, though we prefer growing it in a cold pit, where it succeeds to great perfection. "A Primula a foot and a half high, bearing four or five separate whorls of flowers, each flower an inch in diameter, and of a splendid magenta color, and the plant moreover perfectly hardy—can anything be added to this to indicate its value? We hardly think so."..... 0 25

	Each.
PRIMULA S. RUBRA PLENO, double red.....	1 00
PRIMULA S. GRANDIFLORA RUBRA, very large double red.....	1 50
Two very beautiful varieties of double red Chinese Primrose.	

PRIMULA SINENSIS FIMBRIATA.

Fine seedling plants, raised from the finest strains of single flowers; various shades of color	0 25
----------------------------------------------------------------------------------------------------------	------

PRIMULA CURTUSOIDES AMENA.

PRIMULA C. AMENA ALBA.

Beautiful new Japanese Primroses. The flowers of the first are of a rich rosy purple, the second a pure white of good size, borne in large clus- ters, highly interesting as an early spring flowering plant for pot cul- ture, nearly or quite hardy.....	0 50
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

ALLAMANDA.

Hendersonii or Wardleiana. A distinct and beautiful species, which blooms quite small and continues flowering nearly the whole year, the flowers are circular, of great substance; color a rich deep yellow, fine habit.....	0 50
Nobilis. A distinct and beautiful new species, flowers equally as large as the finest forms of <i>A. Hendersonii</i> , of a pure rich yellow, but which are greatly superior in form to others in cultivation, by their large firm lobes being more widely imbricated.....	0 50

CLERODENDRONS.

Balfouri. A beautiful climbing species, which blooms profusely on the young wood, flowers scarlet and white.....	0 25
Thompsonii. A very beautiful climbing stove plant, with crimson flowers, free, vigorous grower and profuse bloomer.....	0 40
Speciosum. This beautiful plant forms a fine intermediate variety between <i>C. Splendens</i> and <i>C. Balfouri</i> , rich rose or violet tinted crimson blos- soms.....	0 30
Coronaria. A very desirable plant, flowers double, white, very fragrant, fine for bedding out.....	0 25
Clerodendron Viscosissima. This is a handsome hardy shrub from North- ern China, the flowers emit a delicious perfume; flowers lilac-rose, in dense terminal corymbs, a very desirable new shrub.....	0 50

IDESIA POLYCARPA.—(*Polycarpa Maximowiczii*.)

A large tree from the Amour, of rapid growth, with large foliage. This is a very desirable tree for the Northern States, as very hardy. Said to bear a valuable fruit.....	1 00
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

DESMODIUMS.

Japonicum. A pretty dwarf Japanese shrub, which is quite hardy. "Its drooping branches are entirely hidden by millions of its purple flowers, which are freely produced from August to beginning of winter.".....	0 25
Penduliflorum. Similar to the last, with white flowers.....	0 25

ARALIAS.

Japonica, (Sieboldtii.) A very handsome shrub, with large shining foliage.	0 50
----------------------------------------------------------------------------	------

LOMARIA GIBBA.....	Each.
LOMARIA GIBBA CRISPA— <i>crisped leaved</i>	25 to 0 50
	1 00

Dwarf tree ferns of great beauty which cannot be too highly recommended to all lovers of this beautiful class of plants.

CUPHEA HYSSOPIFOLIA.

The habit is very dwarf and compact; flowers bright-lilac and produced in great profusion all the year round, a very pretty small plant..... 0 25

LYCHNIS—DOUBLE WHITE. (*Lychnis Floscuculi pleno.*)

This is a perfectly hardy plant, of quick growth. The flowers are almost identical with a pure white carnation. In bloom the whole Summer. Invaluable to florists Summer work, taking the place of carnations.... 0 30

EUHPHORBIA SANGUINEA.

A good old plant, the foliage is a purplish crimson, distinct from other dark colored foliage plants..... 0 50

THALICTRUM ADIANTOIDES.

A very elegant hardy perennial, from 12 to 18 inches in height, of a neat branching habit; in delicacy of structure it rivals the finest species of exotic Adiantums or Maiden-hair Fern, by the exquisite beauty of its leaf fronds..... 0 50

HEMEROCALLIS.—*Disticha pleno.*—(DAY LILY.)

A double flowered variety of this fine old perennial herbaceous plant, flowers of an orange-yellow; after growing this superb plant two seasons, I can recommend it as one of the most beautiful as well as one of the most valuable hardy herbaceous plants ever introduced..... 0 50

HEMEROCALLIS KWANSO VARIEGATA FL. PL.

A superb hardy plant, producing long deep green leaves, broadly striped with white; in addition to which it produces very large double copper-colored flowers..... 0 50

*NEW STRIPED PHLOX.—*York and Lancaster.*

A very beautiful Phlox—white striped with violet, the marking distinct and constant. Fine large spikes of well shaped flowers.—This plant will be largely grown..... 1 00

NEW STRIPED PHLOX.—*Croix d'Honneur.*

An extremely attractive variety, giving immense spikes of large well formed flowers of a beautiful rosy mauve color; each petal being distinctly and effectively margined with white, thus giving the flower the appearance of a cross..... 0 50

PHLOX.—*Miss Robinson.*

This is a dwarf variety of flowers of the purest white, fine spikes. Considered in England the finest dwarf white Phlox in cultivation..... 0 50

PHLOX.—*Queen of Whites.*

Each.

In the trial grounds of the garden of the London Horticultural Society, this was decided on as the finest White; it was described as having grand panicles of white flowers.....\$0 30

MISCELLANEOUS NEW OR SCARCE PLANTS.

- Abelia Rupestris.* A dwarf compact growing plant, nearly hardy, flowers pure white in long racemes during summer..... 0 25
- Abutilon Boule de Nieve.* (*A colored plate, 1874.*) The Floral Magazine says of it: "Abutilon Boule de Nieve was exhibited by Mr. Standish; it is very valuable as a subtropical plant, bearing exposure to the summer well, and interesting by the contrast of its pure white flowers and green foliage..... 0 25
- Abutilon Duc de Malakoff Variegata.* This is in the style of *A. Thomsoni* but of stronger habit. Its comparatively large leaves, 4 to 6 inches in width, being very richly blotched or mottled with white and gold blotches..... 0 25
- Abutilon Vexillarium Variegatum.* The foliage of this beautiful variety is spotted and blotched in the style of *A. Thomsoni*, and fully as beautiful..... 0 20
- Abutilon Thomsonii.* The color of the leaf is a bright green, shaded and mottled with yellow, having the appearance of mosaic work..... 0 20
- Achillea Ptarmica fl. Pleno.* Blooms freely during the summer months, flowers pure white, double, quite hardy..... 0 25
- Alopecurus Pratensis, Aureo Variegatus.* An elegant form of variegated grass, having the leaves streaked and margined with golden yellow.... 0 20
- Ampelopsis Veitchi* or *Tricuspidata.* A miniature foliaged Virginian Creeper, which clings to any building with the tenacity of the strongest Ivy, is of exceedingly rapid growth, and from earliest spring it produces its beautiful purple tinted leaves, turning red in autumn..... 0 25
- Anemone Japonica Alba,* (Honorine Jobert.) Makes a splendid bed for autumn flowering, large white flowers, handsome perennial..... 0 20
- Anemone Japonica Rubra.* The crimson variety. A fine autumnal flowerer..... 0 20
- Acalypha Tricolor.* Foliage irregularly blotched and mottled with crimson; a very distinct plant, fine for bedding..... 0 30
- Aquilegia Chrysantha.* This is unquestionably one of the finest Perennials Its large golden yellow long spurred flowers are produced in great abundance, from densely tufted plants, which maintain a long succession of blooms. It is a native of the Rocky Mountains..... 0 25
- Aquilegia Chrysantha Cærulea.* A variety of the last with blue flowers, and fully as beautiful..... 0 25
- Aquilegia Californica.* A species of recent introduction, very beautiful... 0 25
- Aquilegia Wittmaniana.* This is a remarkably fine new species, with large purplish blue flowers..... 0 50
- Asclepias Curassavica.* A very ornamental plant for summer decoration, blooming from July to November, growing about three feet in height. The stem terminated with heads of yellowish scarlet flowers..... 0 25
- Aquilegia Glandulosa*..... 0 20
- Aquilegia Skinnerii*..... 0 20
- Aquilegia Cærulea.* A very fine blue Columbine from the Rocky Mountains..... 0 25
- All beautiful hardy perennials.
- Aspidistris Lurida Variegata.* A large foliage plant, leaves finely striped with white and green. A very valuable plant and nearly or quite hardy..... 0 50
- Bambusa Fortunei Variegata.* Beautifully variegated Palm-like leaves; it is a very ornamental plant; it is splendid as a single plant; in the summer it requires abundance of moisture..... 0 30

	Each.
Bambusa Metake. A very graceful and beautiful bambo.....	0 40
Bambusa Aurea. This plant has a golden tinge over stems and foliage. Beautiful.....	0 50
Bougainvillea Glabra. This is the freest grower and bloomer of the genus, a very fine winter blooming plant; color a rosy pink.....	0 40
Boussingaultia Basseloides Variegata. A handsome silver variegated plant, which beds out admirably during summer.....	0 25
Browallia Elata Major. A plant of quick, compact growth, with rich blue flowers, fine for bedding or winter blooming in the greenhouse...	0 25
Centaurea Gymnocarpa. Leaves of a downy white, forming an admirable contrast with <i>Coleus</i> and other foliated plants	0 20
Centaurea Argentea Plumosa. This variety has very elegant silvery sur- faced leaves, long and Fern-like.....	0 20
Centaurea Clementei. Of robust growth, producing large rosette-like leaf clusters from the base, with white serrated leaves.....	0 20
Centaurea Candadissima. Fine white foliage.....	0 20
Centaurea Babylonica. Foliage silvery.....	0 20
Centaurea Nigra Aurea Marginata. Green, margined with gold; a very effective plant in spring and autumn, and nearly or quite hardy. Very desirable.....	0 50
Cineraria Maritima. Silvery foliage.....	0 15
Cineraria Maritima Candidissima. A valuable improvement; foliage and branches of a pure silvery white; well adapted for borders, groups, etc.....	0 20
Cissus Lindenii. The foliage of this showy plant is bright green, veined and banded with silvery white.....	0 25
Cissus Discolor. Foliage beautifully shaded with silver, crimson and purple.....	0 25
Caladium Esculentum. A magnificent plant for bedding out where large, broad tropical foliage is desirable, grows about four feet high, very effective.....	20 to 0 30
Erythrina Crista Galli. Beautiful summer flowering plant with dark crimson coral-like flowers The roots, which are fleshy, can be put away in a cellar, like <i>Dahlias</i> during winter. There is no plant more valuable than this for bedding out in our climate, and very beautiful,	0 25
Erythrina Madame Belanger. A very beautiful coral plant, dwarf com- pact habit, very free flowering.....	0 50
Erythrina Herbacea. This fine species is a native of our Southern States, flowers rich coral, very free.....	0 30
Eranthemum Andersonii or Elegans. This very beautiful plant is of free vigorous growth, producing long terminal spikes of its pure white and rich lake flowers during the winter months, which last a long time in perfection—a plant of great beauty.....	0 30
Fittonia Argyroneura. A trailing plant with light green foliage, beauti- fully striped with white; will be invaluable for hanging baskets or vases.....	0 25
Gymnostachyum Pearcei. A new and superb species, equal or superior in habit and coloring to the above, and in every respect one of the most beautiful of foliage plants.....	0 25
Gymnostachyum Giganteum. In this beautiful species we have a plant of equal beauty with the two foregoing, but much more robust and vig- orous in growth.....	0 25
Gymnostachyum Verschaffeltii. Stems and branches are of a reddish tinge, red leaf stalks, upper surface of the leaf smooth and richly painted with reticulations which vary from red to rich pink, passing into bril- liant scarlet.....	0 25
Graptophyllum Pictum. Leaves deep green with a large blotch of bright gold in the centre, a beautiful foliage plant, requires a hothouse.....	0 50
Helleborus (Christmas Rose) Niger. Blooms mid-winter, flowers white...	0 50
Helleborus Olympicus. Flowers large white.....	0 50
Helleborus Orientalis. Another fine species, flowers white.....	0 50
Iberis Gibraltarica. This beautiful plant, flowers pure white, in pro- fusion.....	0 25

	Each.
<i>Iberis Sempervirens</i> , (Evergreen Candytuft.) Pretty dwarf shrubby plants, which are covered with snow white blooms in the early spring months; hardy and of the easiest culture.....	0 25
<i>Iberis Cariacea</i> . A strong grower; fine head of pure white flowers; fine for florists.....	0 25
<i>Iberis Tenoreana</i> . Another fine variety; flowers white	0 25
<i>Iberis Iberica</i> . A dwarf species, pretty.....	0 25
<i>Justicia carnea</i> . A winter bloomer, flowers pink.....	0 25
<i>Leonothus Leonorus</i> . This is an old but very beautiful plant, which succeeds admirably bedded out during summer, where it will produce its remarkably long terminal spikes of brilliant orange colored flowers in dense zone, throughout the summer.....	0 30
<i>Kleinea Repens</i> . A plant that can be highly recommended. It is a free flowerer, bushy in habit, and the leaves are about 3 inches long, by $\frac{1}{4}$ of an inch in diameter, perfectly round, and a bright blue in color; a succulent plant of easy growth. This is a very distinct plant.....	0 30
<i>Ligularia Kempferi Argentea</i> . A herbaceous plant nearly or quite hardy, with large finely variegated leaves, very superior to the well-known <i>Farfugium grande</i>	0 40
<i>Libonia Penrhosiensis</i> . Freely producing its fine showy flowers, which are of a bright rich crimson color, passing into fiery red. It blooms in the most profuse manner in the depth of winter.....	0 25
<i>Libonia Floribunda</i> . A very pretty plant, bearing a profusion of scarlet and yellow tube-shaped flowers from the axils of each leaf, a most desirable winter-flowering plant.....	0 25
<i>Lysimachia Nummularia Aurea</i> . This is a new variety of that old favorite known as <i>Moneywort</i> ; it differs from the old variety only in the color of the foliage, which is of a soft yellow color.....	0 15
<i>Mikania Violacea</i> , (Parlor Ivy.) A creeping plant with purplish green upper surface of leaf; under, glossy carmine.	0 20
<i>Mesembryanthemum Cordifolium Variegatum</i> . An exceedingly attractive variegated foliaged plant. The branches are furnished with flat fleshy heart-shaped leaves, distinctly margined with cream color, and form a diffuse yellowish mass, entirely covering the surface of the ground; flowers purple.....	0 15
<i>Othonna Crassifolia</i> . An exceedingly beautiful plant for hanging baskets... ..	0 15
<i>Ophiopogon Spicatum Argentea Marginatum</i> . A half hardy Japanese plant, with broad grassy leaves, margined with white, and producing freely white flowers.....	0 50

PEPEROMIA ARGYREA.

PEPEROMIA MACULATA.

PEPEROMIA MAGNOLIFOLIA.

PEPEROMIA VERSCHAFFELTI.

Pretty dwarf growing plants, requiring partial shade and moisture, suitable for baskets and warden cases. The color of the leaves are delicately blended, being bright green along the lines of the nerves, and greyish white between	0 20
<i>Plumbago Capensis</i> . We have no plant of the same color of flowers to approach this for summer bedding. Plants bedded out in May will continue flowering through the summer; color a delicate azure blue. The plants can be kept in a cellar during winter.....	0 25
<i>Plumbago Larpentæ</i> . Like the last, this blooms through the summer; color bluish purple.....	0 25
<i>Peristrophe Angustifolia Aureo-Variegata</i> . Leaves are bright orange in the centre, and margined with dark green.....	0 15
<i>Richardia Alba Maculata</i> . This is a species of "Calla," the leaves of which are spotted with white. It succeeds best planted in the open border during summer and taken up in the autumn. The flowers are white, shaded inside with violet	0 25

	Each.
* <i>Spirea Palmata</i> . This is undoubtedly the finest species in this genus, and one of the best hardy plants of recent introduction. The flowers are deep crimson, and produced in large terminal corymbs which are from six to twelve inches in diameter. It flowers during the month of June, and is very effective.	1 00
<i>Salvia Heeri</i> . The flowers are tubular, 1½ to 2 inches in length, with small lip, bright glossy scarlet with carmine tint in the throat, and borne in long terminal spikes 12 to 18 inches long.	0 20
<i>Salvia Splendens Alba</i> , (White Scarlet Sage.) A novelty in the form of a white variety of the well known Scarlet Sage, in which not only the flower, but also the calyx or outward flowering sheath is of the purest white.	0 20
<i>Sanchezia Nobilis Variegata</i> . Leaves upwards of twelve inches in length, and of most intense green, the veins being broadly margined with golden yellow.	0 25
<i>Thysacanthus Rutilans</i> . The flowers of this plant are borne in long pendulous racemes, having a very graceful appearance, bright scarlet color.	0 50
<i>Thymus Citriodorus Aureo-Marginatus</i> . A beautiful dwarf-growing variety; the leaves are dark green, broadly margined with rich yellow.	0 15
<i>Thunbergia Laurifolia</i> . This magnificent climber cannot be too highly praised. To the Florist, and all who require winter blooms, it is indispensable, as it flowers in the greatest profusion during the winter months. Color delicate violet blue.	0 50
<i>Thunbergia Fragrans</i> . Another valuable winter blooming plant, flowers pure white, and free flowerer.	0 50

NERIUM—Oleanders.

We have given much attention to the collecting of the very choicest *Neriums* from the finest growers in Europe, and the following may be confidently relied on as the finest in cultivation.

	Each.
<i>Album plenum</i> . Double white, fine.	0 50
<i>Album Maximum</i> . A very large and pure white semi-double.	0 50
<i>Atropurpurea plenum</i> . Dark purple, double rich color.	0 50
* <i>Flavum duplex</i> , (new.) Double yellow, fine, distinct.	1 00
* <i>Gloriosum</i> , (new.)	1 50
<i>Grandiflorum plenum</i> . Cherry crimson, large and double.	0 30
<i>Jean d'Arc</i> . Pure white double.	0 50
* <i>Madoni Grandiflorum</i> , (new.) Beautiful double pure white flowered splendens, free blooming, superb.	0 50
<i>Mad. Chas. Baltet</i> , (new.) Cherry carmine, large and very double, a fine variety.	0 50
<i>Souvenir de Claude Sahut</i> , (new.) Rich carmine, large and very double, very beautiful.	0 50
* <i>Professor Durand</i> , (new.) Flowers yellow, double, finest double yellow <i>Nerium</i>	1 00
* <i>Cardinale</i> , (single.) Brilliant color, nearly scarlet.	1 00
* <i>Geant des Batailles</i> , (new.) Exceedingly brilliant, nearly scarlet.	1 00
* <i>Luteum Novum</i> , (new.) Fine new yellow single.	1 00

The above are all beautiful varieties of this well-known summer ornamental plant.

NEW BOUVARDIAS.

For autumn and winter blooming plants, the *Bouvardias* are well known to every florist. They are of the easiest culture, giving their rich colored flowers in great profusion.

	Each.
<i>Bridal Wreath</i> . The bloom is produced freely in large clusters of white flower-lobes, broader than any other in its section, fragrant.	0 30

	Each.
Alba Odorata. Pure white centre of great substance, and very richly fragrant.....	\$0 20
Candadissima. Racemes of pure white blossoms, each three-quarters of an inch in diameter.....	0 30
Humboldtii Corombiflora. The blossom is the largest hitherto known in the group, four sizes larger than the well-known <i>B. Jasminoides</i> ; the flower tube 3 inches in length, snow white, and exquisitely fragrant...	0 40
Jasminoides Longipetala. Compact racemes of large pure white trumpet-like flowers, with petal lobes nearly an inch in width.....	0 30
Maiden Blush. Bright blush pink flowers. As a winter-flowering kind it will be found an elegant acquisition, being distinct in color from any other.....	0 30
Umbellata Alba. Broad pure white petal lobes; is in the style of <i>B. Davidsonii</i> , but much neater in its leaf growth.....	0 25
Leiantha. Dazzling scarlet.....	0 25
Floribunda. Flowers orange scarlet, very distinct and fine.	0 25
Hogarth. Splendid raceme, rich scarlet, vigorous grower, fine habit.....	0 25
Longiflora. Snow white, long tube, beautiful.....	0 25
Hendersonii. Delicate waxy flesh color, a sport from <i>Hogarth</i>	0 25
Elegans. Color a scarlet carmine, flowers and trusses of immense sizes, larger than any other variety.....	0 25
Laura. Bright pink.....	0 25
Jasminoides. A beautiful species in the way of <i>B. Longiflora</i> . It is a more ready blooming plant, with larger terminal and auxiliary racemes of equally fragrant snow white flower tubes.....	0 25
Davidsonii or Vreelandii. The finest of all white <i>Bouvardias</i> , and of the free growth of its parent <i>Hogarth</i>	0 25

DRACÆNA.—Dragon Tree.

Our rich collection of *Dracænas* was awarded first premium by the Maryland Horticultural Society, September, 1855, and again in Sept. 1876.

For decorative purposes these plants are now extensively grown, their broad dark tropical foliage and graceful habit render them very appropriate.

	Each.
*Amabilis, (new.) This magnificent variety is extremely distinct and effective. The ground color of the leaf is bright glossy green, becoming, beautifully marked and suffused with pink and creamy white, the young leaves being occasionally of quite a rosy color.....	\$1 00
*Baptistii, (new) The leaves are green, 1 to 1½ foot long, 4 inches broad margined and irregularly and obliquely striped with narrowish creamy white flakes, passing through pale pink to deep rose. The older leaves frequently become flushed with rose. It is an extremely handsome and thoroughly distinct variety.....	1 00
*Excelsa, (new.) Large leaves, of an erect arching habit, and of a deep bronzy hue, margined with deep magenta crimson. This bright color is continued throughout the edge of the leaf, breaks out into streaks and patches.....	1 00
*Fraseri, (new.) Of a stout and stocky habit. The leaves, which are erectish, a foot or upwards in length, and as much as 5 inches broad, are margined with bright rosy lake. The principal part of the leaf is of a blackish purple, with a glaucous bloom, a marginal stripe of deep magenta runs down into the edge of the petiole, while here and there besides may be seen a streak of the same rich rose color. It is certainly one of the finest <i>Dracænas</i> known.....	1 00
*Grandis, (new) The leaf is a foot long and four and-a-half inches broad, with striated surface, which is of a shaded deep green, broadly edged near the base with blush white, the extreme margin being of a deep magenta rose, which becomes more or less suffused over the pallid portions.....	1 00

	Each.
Guilfoylei. A most superb species, with long pendant lanceolate acuminate leaves; the ground color is bright green; fully one-half the leaf, however, is striped with white and bright rosy red, the latter color mostly forming the border in addition. One of the most ornamental greenhouse plants at present in cultivation.....	1 00
*Hendersoni, (new.) One of the very finest forms in this highly decorative group, being distinct from all preceding varieties, not only in its elegant and graceful habit, but in the leaves being uniquely and beautifully variegated with white, rosy-pink stripes upon a light green ground.....	1 00
*Imperialis, (new.) The variegation is in this case of a clear white combined with deep rose. The color is a deep sap green, breaking out freely in the young leaves into white, which is most prominent near the base of the leaf, and extending upwards. These variegated portions take on, as the leaves gain age, a deep bright rosy tint. It is a remarkably fine plant.....	1 00
*Magnifica, (new.) This is a very handsome plant; leaves nearly two feet in length and eight inches in breadth, when the plant is well grown. The footstalks are reddish purple, and the leaves are rich bronzy brown, suffused with pink, becoming darker with age.....	1 00
*Metallica, (new.) This is the finest of all the dark-colored <i>Dracænas</i> , the leaves being as much as 16 inches long. These, together with the sheathing leaf-stalks, are of a uniform rich coppery purplish hue when young, becoming a dark purplish bronze when mature. The leaves are somewhat erect and arching.....	1 00
*Nigro-Rubra, (new.) A robust-growing and exceedingly beautiful plant; leaves upwards of eighteen inches in length, ground color rich brown, the centre crimson, shaded with rose; it is a most desirable variety.....	1 00
Regina, (new.) This is a plant producing very large and broad leaves, the ground color is bright green, but fully one-half the leaf is variegated with creamy white, which produces a rich and most beautiful effect....	1 00
*Shepherdii, (new.) A noble form of <i>Dracæna</i> , and one of the finest in cultivation. This plant takes on its distinctive coloring gradually on the older leaves, the young ones being green, and showing paler green stripes on those parts which take on at a later period the peculiar bronzy orange hue. It is very free-growing, of ample proportions, the broad oblong linear leaves 2½ feet long and 5 inches broad, tinted at the edge with the same bronzy orange color.....	1 00
*Splendens, (new.) A distinct plant, of dwarf and compact but free-growing habit, densely furnished with short recurved leaves, about nine inches long and four inches broad. The color is a deep bronzy green, breaking out in the young growth into bright rosy carmine. The brighter coloring appears sometimes in stripes, and sometimes occupies the whole surface.....	1 00
Ferrea. Foliage broad dark crimson.....	50 to 0 75
Nobilis. Foliage broad, bright crimson, very rich.....	0 50
Nigrescens. Foliage very dark, blackish brown, a very distinct variety...	0 75
Spectabilis. Foliage long green, very graceful.....	0 50
Terminalis. Foliage bright crimson.....	30 to 0 50
Terminalis Stricta. A variety with very brilliant foliage.....	1 00
Cooperii. Foliage gracefully recurved, rich crimson.....	30 to 0 75
Congesta. Graceful narrow green leaves.....	0 50
Braziliensis. A robust-growing species with large, broad green foliage...	0 50

Extra sizes of the above can be supplied, \$2 and \$3 each.

CORDYLINE.

Australis. Very long narrow graceful foliage	30 to 0 50
Indivisa. Long narrow graceful foliage.....	30 to 1 00
Vivipare var. Leaves deep green.....	0 30

Australian plants of much grace and beauty, admirable for vases, single specimens on lawns, &c.

HIBISCUS ROSA SINENSIS.—Chinese Hibiscus.

All are magnificent plants for bedding out.

	Each.
Grandiflora. This is a beautiful new plant in the way of the fine old plant <i>H. Rosa Sinensis</i> , it has very large flowers of rosy crimson, one of the finest plants for bedding out; magnificent.....	0 25
Cooperii tricolor. Beautifully variegated in foliage and flowers.....	0 25
Rosa Sinensis. Flowers deep crimson, single.....	0 25
Rosa pleno rubra. Double crimson.....	0 25
Rosa pleno Jaune. Double yellow.....	0 25
Rosa pleno Aurantiaca. Double orange.....	0 25

CROTON or CODIUM.

These very ornamental plants are natives of the South Sea Islands; they are among the most beautiful of variegated plants, the leaves being blotched with yellow and red in various ways, which renders them most attractive and valuable for decorative purposes. They are of the easiest culture, succeeding in any warm greenhouse.

Our rich collection of Crotons was awarded first prize by the Maryland Horticultural Society, Sept., 1876.

	Each.
Aucubæfolium. Leaves large dark green, blotched with golden yellow....	50 50
Angustifolium. Leaves very long green, blotched with red and yellow....	0 30
Hillianum. Dark green, blotched and splashed with red and yellow.....	0 40
Cascarilla. Leaves long, twisted and crimped, blotched with golden yellow.....	0 30
Interruptum. Very long leaves, nearly an inch broad, midrib bright scarlet, shading to a golden yellow; an exceedingly graceful plant....	0 40
Longifolium. Leaves green, blotched and striped with golden yellow, very long and graceful; a magnificent plant.....	0 40
Picta. Foliage dark green, spotted with red and yellow.....	0 30
Variegatum. Leaves dark green, blotched and spotted with golden yellow.....	0 25
Varietum Elegans. Leaves dark green, striped with gold, midrib golden yellow.....	0 30
Variegatum Rubrum. Leaves dark green, striped and spotted with red and golden yellow.....	0 30
*Majesticum, (new.) A truly grand variety, of free growth; leaves from twelve to eighteen inches long, somewhat narrow: when young the leaves are deep green, ribbed with golden yellow, the green changing with age into a deep olive and the yellow becomes crimson; this, with its elegant drooping habit, renders it very attractive.....	1 50
*Weismanni, (new.) This is one of the most beautiful of all the forms; leaves about a foot long and three-fourths of an inch wide; ground color shining bright green, striped and mottled with golden yellow....	1 50
*Veitchii, (new.) A splendid variety, perfectly distinct from any other known kind, both in size of foliage and in coloring. The leaves attain a length of twelve to fourteen inches, and two and-a-half inches in breadth, and are traversed by broad bands of creamy yellow, which change with age into rose and carmine purple.....	1 50
*Johannis, (new.) An exceedingly elegant plant; the leaves are from twenty to twenty four inches long, narrow and pendulous, ground color bright shining green, the margins and midrib bright orange yellow, a beautiful variety.....	1 50
*Irregular. Leaves broadest at the base, and tapering to an obtuse point, about nine inches long, and most diversified in shape, scarcely two leaves resembling each other; ground color dark green, midrib orange yellow, with the upper surface of the leaf irregularly spotted and blotched with yellow.....	0 75

GARDENIA—Cape Jasmine.

The Cape Jasmine is well known for its delicious fragrance, as well as the beauty of the flowers, which are large, white and double.

	Each.
Florida. Large double white.....	25 to 0 50
Florida Major. Very large double.	25 to 0 50
Florida Majestica. Very large double white.....	25 to 0 50
Fortunii. Fortune's large double white.....	25 to 0 50
Camelliflora. Large double white.....	25 to 0 50
Radicans. Profuse bloomer	20 to 0 40
Radicans Variegata. Variegated leaves.....	20 to 0 50

LOBELIAS.

Blue King. Very large flowers, of the most lovely blue, with a clear white eye.	Grandiflora superba. Compacta alba. Carter's Cobalt Blue. Very beautiful.
Paxtonia. Blue, white centre.	White Perfection. Finest white.

Gordonii. Blue, fine variety.	Stricta multiflora. Erect, blue.
Gracilis Cœlestina. Celestial blue.	Erecta bicolor. Blue and white.

These pretty flowering plants are indispensable for baskets, vases, &c.; they are also valuable for the margins of beds, blooming for several months. Price 15 cents each—save where priced. \$1.50 per dozen.

SWEET SCENTED VIOLETS.

Double Blue Neapolitan. Light blue.	
The Czar. Blush purple, large and fine.	
Schoenbrun. Ever blooming, single dark blue.	
Queen of Violets. Double white, back of petals blue, large and fragrant.	
King of Violets. Large and double, indigo shaded with violet.	
Marie Louise. Very fine double flowers, purple, with white centre, forces well.	
Princess Louise. Double white, fine.	
Devoniensis. Single blue, large, very fragrant.	
Victoria Regina. (Lees.) This is a most beautiful Single Violet, with blooms 1½ inch in diameter, pale blue, very fragrant.	
Double White. Pure white.	
Price 25 cents each. \$2.50 per dozen.	

ECHEVERIA.

These pretty plants are similar to the *House-Leek*, but much more ornamental.

Secunda Glauca. Leaves of a beautiful glaucous hue, flowers yellow and scarlet.	
Metallica. Very large, shell like leaves, of a beautiful metallic lilac hue.	
Sanguinea. Leaves of a deep bright color, fine.	
Price 25 cents each. \$2.50 per dozen.	

LAGERSTRAMEA (Crape Myrtle.)

	Each.
Indica Alba. White Crape Myrtle, a very beautiful shrub.....	\$0 25
Indica Rosea. Rose or pink, the variety generally grown.....	0 25
Indica Purpurea. A bright purple, a vigorous grower and free bloomer..	0 25
Indica Magenta. Color a bright magenta.....	0 25

Each.

Indica New Crimson. Bright deep crimson, no variety hitherto introduced approaching it in color; a profuse bloomer, giving immense heads of its rich flowers..... 0 25

The *Crape Myrtle* is well known in this latitude and South as our most beautiful summer flowering hardy shrub. North, it will need protection.

PUNICA—Pomegranate.

Nana. A beautiful dwarf, free-flowering Pomegranate. It blooms freely in a very small state, and larger specimens are sheets of bloom. It is highly recommended for bedding purposes, being a profuse bloomer, and exceedingly desirable from its rich color, brilliant orange scarlet, 0 25

Alba Pleno. Double white..... 0 30

Rubra Pleno. Double red..... 0 30

Rubra Prolifera. A profuse flowerer..... 0 50

Legrellæ Pleno, (new.) Reddish yellow bordered with white, very double, splendid... .. 0 50

HYDRANGEAS.

Acuminata. This exceedingly beautiful new variety has large heads of pink flowers, withstands the sun well..... 0 25

Glauca or Nivea. A native species, flowers white..... 0 25

Hortensia. The well-known garden variety, has immense heads of beautiful pink flowers..... 0 25

Hortensia Imperatrice Eugenie. Large heads of pink flowers, tinted with blue..... 0 25

Hortensia Variegata. Leaves green, margined with yellow..... 0 50

Hortensia Variegata Speciosa, (new.) In this striking variety the margin of the leaves are green, with a broad white band passing through the centre..... 0 75

Involucrata Vera. A beautiful and distinct new species..... 0 25

Japonica Lindleyi. New and distinct..... 0 25

Otaksa. Flowers large bright pink tinged with blue, last a considerable time; a splendid plant..... 0 25

Paniculata Grandiflora. A highly ornamental shrub with enormously large dense flower heads, opening pure white and tinted with rose in their mature bloom, flowers profusely during summer, and perfectly hardy..... 25 to 0 50

Pubescens. Leaves very downy, flowers pure white..... 0 25

Quercifolia. Oak leaved, leaves large dark reddish tinge, flowers white, hardy..... 0 50

Stellata Flora Pleno. A magnificent new Japanese variety, flower heads very large, double, of a bright pink..... 0 50

Thunbergii Flora Percis. A distinct species, much smaller foliage, and flat cymes of pretty blue flowers..... 0 50

Thomas Hogg. See NOVELTIES.....

PASSIFLORA—Passion Flower.

Trifasciata. Leaves dark green, tri lobed, each lobe having a broad central band of rose, a very distinct Passion Flower, flowers white 0 30

Princeps. Flowers rich crimson, a very fine greenhouse climber..... 0 50

Cœrulea. Cœrulean blue, a beautiful old variety, nearly hardy, requires only slight protection in severe weather 0 30

Incarnata. This variety is perfectly hardy in this latitude. In very severe winters it is killed to the ground, but on the return of spring it puts out with great vigor, growing luxuriantly, and flowering profusely during the summer months; similar in color to *Cœrulea*..... 0 25

TACSONIA—A Section of *Passiflora*.

	Each.
Van Volxemi. A splendid conservatory climber, with large scarlet crimson blossoms; it may be regarded as a scarlet greenhouse Passion Flower, an exceedingly beautiful climbing plant	0 40
Buchananii. Another magnificent conservatory climber, with brilliant orange scarlet flowers, most profuse bloomer, and one of the finest Passion Flowers.....	0 50

CLEMATIS.

Among the most beautiful of climbing plants are the Clematis—whether trained over lattice work, on pillars or trailing on the ground. There can now be found among them great variety of color, all are profuse bloomers, and quite hardy.

Class I.**PERPETUALS, Summer and Autumn-bloomers flowering on shoots of the same year's growth.**

	Each.
Flammula. Sweet scented, the flowers are small, pure white and fragrant..	\$0 25
Alexandra. Large flower, color reddish violet. The habit of this variety is most luxuriant, and blooms finely through the summer.....	0 75

Uranie. Very large flower finely striped with scarlet upon a lilac ground, orifice deep straw yellow.....	0 40

The collection of 8 varieties \$3.00.

NÆGELIA.

*Emma le Febvre. Handsome thyrses, color delicate; tube rosy flesh, the whole of the interior pure white.....	0 50
*Reine Marie-Henriette. Orange with beautiful dottings of same color upon a cream ground; superb pyramid.....	0 50
*Fulgida Concolor. Is a magnificent plant, producing vermilion-colored flowers of great brilliancy.....	0 75
*Sceptre Brilliant. Flowers of a brilliant vermilion and a shading of the most beautiful shiny lilac.....	0 50
*Fulgida Van Houttei. Its sparkling vermilion, its snow-white interior covered with distinct balls of vermilion, make this plant an object of great beauty.....	0 75
*Grand Mogul. Flowers of the most intense vermilion, are wonderfully framed on a citron yellow ground	0 50

PLECTOPOMAS.

*Viola. Flowers are of perfect shape, of the most exquisite bright rose, ornamented on the upper part with a large white spot, speckled with carmine and flaked with citron.....	0 75
*Labyrinthicum. Flower is rich vermilion, with fantastic figures resembling geographical demarcations.....	0 75

NEW FRENCH GLOXINIAS.

The varieties of this genus are all very handsome, producing abundance of magnificent flowers of the most beautiful description. The tubers should be potted in February or March. Place in a little heat to start them into growth; water sparingly till the plants are well established. When in bloom bring them into the conservatory or drawing room. After the plants have done blooming, dry gradually off, by withholding water from their roots; afterwards remove them to a warm, dry place,

The following are superlatively beautiful.

Those marked thus (e) have erect flowers.

- (e) Cinderella. Pure white, with pink band, most beautiful.
- (e) Brilliant. Bright crimson, margined with rose, rich violet throat.
- Ernst Banary. Dark lavender mottled with white, a beautiful flower.
- Don Louis de Portugal. Tube white, the throat spotted with carmine lilac.
- (e) Flag of Truce. Pure white, large and fine.
- (e) Georgina. Fine lilac, covered with magnificent creamy white palmes.
- Henry Husson. White, with a lavender lip, a large showy flower, beautiful.
- Leon Vanderwee. Flowers having six divisions, each covered with dark, almost black spots, edges white.
- (e) Madame de Smet. White, with violet lobes, a beautiful marked variety.
- Rose d'Amour. Rose carmine, cream-colored throat, zone of cerise.
- Mogul. Tube dotted with red, purple crimson limb, very clear at the border.
- Nero. Dark purple, white throat, a very beautiful flower.
- (e) Princess Royal. Tube and edges white, throat mottled with dark blue, fine.
- Scarlet Gem. Crimson scarlet, extra fine.
- (e) Virginalis. Tube and throat white, broad margin of carmine.

Price 25 cents each, \$2.50 per dozen.

NEW GLOXINIAS—Veitch & Sons—new set.

	Each.
Madame Patti. Fine scarlet flower; throat deep red shaded with purple slightly blotched with white; margin rosy scarlet	0 60

ZONALE and NOSEGAY GERANIUMS.

Class 1.

GENERAL COLLECTION.

For bedding out during the summer, there is no class of plants used so extensively at the present day in Europe, as this. In this country it succeeds to perfection, flowering profusely during the heat and drought of summer, when Verbenas and such like plants suffer or are burned up. They are equally beautiful and valuable in the plant house during winter.

*Price 10 cents each, \$1.25 per dozen, \$8 per 100, our selection.

20 cents each, \$1.50 per dozen, \$10 per 100, purchaser's selection, (save where priced.)

NEWER ZONALE and NOSEGAY GERANIUMS.

Class 3.

The varieties in this class are all recent importations, and comprise the very finest of their classes, sent out by the best growers of England and the continent.

Price 30 cents each, \$3 per dozen, (save where priced.)

- Annie. White, delicately tinged with pink.
- Arabella. Pinkish salmon, large truss, fine form.
- Black Diamond. Rich dark crimson, large truss, superb.
- Beau Villageosis. A gay and effective variety with large rich orange tinted salmon flowers, and blush outer belt, the best of its color.
- Belle Esquemoise. A very beautiful variety, flowers large, individual blossoms nearly circular, pure white, with a well defined, light salmon centre; the most perfect in its group. 50 cents
- Butterfly. Blush white, striped and flaked with pink.
- Coquette. Soft rose, striped and branded with white
- Ecstasy. Salmon, blotched, striped and flaked with white.
- Elsternix. Rosy salmon, striped and marbled with white.
- Pantaloon. Bright orange salmon, flaked and striped with white.
- Day Down. White ground delicately tinged with lilac.
- Distinction. Beautiful distinct foliage quite ornamental without its crimson flowers.
- Defenseur de Belfort. Purplish red veined with carmine, immense trusses; extra.
- Jessica. Dark maroon crimson color, trusses large and globular, erect and well supported, a compact dwarf habited plant, very fine dark flowers.
- Emilie Henderson. Delicate rosy salmon, fine truss and habit.
- Grand Duchess. Deep crimson, immense truss, a grand flower.
- Striata Perfecta. Fine orange tinted salmon, striped or barred with white towards the margin, a large, well expanded, good shaped flower.
- General Riviere. Rich vermilion with white centre, a fine variety.
- N. D. DeBeunant. White with a rose centre, compact habit, a very large white flower.
- Heron. Magenta crimson shaded with violet, very attractive, fine.
- Maia. This variety gives us a splendid new shade of purple pink, the purple tint having really a most striking and distinct appearance, with broad petals.
- Mrs Standing. Deep violet suffused with scarlet, beautiful.
- M. Ugo Cejali. Red tinted with violet, enormous truss, very fine.
- Oliver. Deep magenta, tinted with violet, shaded with scarlet
- Salamis. Rosy-lake tinted with violet, attractive and very showy
- Sentence de Trianon. Violet rose shaded with white, very superb.
- Rosalie. A very beautiful variety, trusses large, very free flowering, compact habit, neat bedder.
- Zenobia. Flowers of a bright cherry crimson with a large white eye, extremely floriferous, trusses large and globular, habit very dwarf.

LILLIPUTIAN ZONALE GERANIUMS.

This is a new and interesting form of the zonal section. The growth is very distinct from the ordinary kinds, being proportionately vigorous, whilst the leaves are small, and the flowers equal in size to the zonal varieties of large growth. The properties of a vigorous and compact dwarf growth, combined with small foliage and blooms equal in size to the large growing class, will be a sufficient recommendation.

Price 20 cents each, (save where priced.) The set of 9 for \$1.50.

- | | |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------|
| Cupid. Light copper rose, white centre. | Little Golden Christine. Leaves yellow, flowers scarlet, very pretty. |
| Little Dorrit. Salmon rose, white eye. | Tom Tit. Dazzling scarlet, white eye. |
| Little Harry. Scarlet, light centre, good truss. | Payne's Perpetual. Miniature, yet dense growth, bright scarlet flowers render it very distinct. |
| Little Dear. Delicate rose, with white spots. | Richard Dean. A beautiful dwarf variety, bright orange scarlet, with brilliant white eye. |
| Little Gem. Brilliant vermilion, white centre. | |

DOUBLE FLOWERED GERANIUMS.

GENERAL COLLECTION.

This class of double flowered Geraniums form an interesting and valuable addition, not only from their novelty, but their great value for bedding out. We have found them during the past hot dry summer ('76) very superior to the single flowers, throwing up their immense heads of gorgeous flowers, which are of long duration, like all double flowers. We feel great pleasure and confidence in offering the following:

For new varieties, see under head of "New and Rare Plants."

Price 15 cents each, (save where priced,) \$1.50 per dozen, my selection. Purchasers' selection \$2 per dozen.

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Andrew Henderson. The truss is of extraordinary size, scarlet. | Carl Vogt. Very double, of an orange salmon color, quite a new shade; free flowerer, a very desirable novelty. 25 cents. |
| Aline Sisley. Flowers white, of moderate size, and almost perfect in form. | Deuil de Strasbourg. A distinct new color, bright claret, beautiful new flower. |
| Asa Gray. An extremely free-flowering variety; the flowers are of large size, very full and double, light salmon orange color, somewhat similar to the variety <i>Gloire de Corbeny</i> . | Dr. W. Neubert. Very double rich scarlet, immense truss, one of the best winter bloomers. |
| Alice Crousse. Flowers large, full and of good form, white with salmon centre. | Duc de Suez. Very double scarlet crimson, trusses of immense size. |
| Aurora. A very fine dwarf-habited and short-jointed variety; flowers bright scarlet and freely produced; pips large, double. 25 cents. | C. Glym. Immense trusses of orange scarlet flowers. |
| Aglaia. Flowers very double and of a scarlet crimson. This is perfection in habit, being the most dwarf and compact growing of any of the doubles yet sent out. 25 cts. | E. J. Lowe. The trusses and pips are large and well-formed, bright scarlet. |
| Charles Lyell. Flowers dark Apricot color, shaded with white. | Francois Arles Defour. Immense, double, color deep crimson. |
| Crown Prince. Flowers large, are of a deep rosy carmine color. | Gloire de Nancy. Very double scarlet flowers. |
| | Glory of Paris. Color rich crimson; truss large. |
| | Goliath. Glowing scarlet, trusses well above foliage. |
| | Gambetta. Truss large, color bright red. |

- Georges Sand. This is a great improvement on "Aline Sisley," the flowers are much larger, pure white under glass, assuming a slight rosy flesh-color when exposed to the sun, it is also more double. 25 cts.
- Francois Pertusati. Salmon flesh, margined with white, fine compact habit, and profuse bloomer. A distinct color, one of the finest novelties. 25 cents.
- Harlequin. Double scarlet, occasionally striped with white. 25 cts.
- Incendie de Fontenoy. Trusses of immense size, brilliant orange, free bloomer.
- Jewel. The habit is very dwarf and free-flowering; the trusses are well-formed, of good size, and the flowers of a fine deep scarlet color. 25 cts.
- Jacobæa. The flower of this variety is a novel bluish purple color, approaching in form and appearance the well known Senecio, (Jacobæa.) Habit dwarf and slender. A good winter flowerer. 25 cts.
- Jeanne de St. Maur. Dazzling dark scarlet, fine large flowers.
- Louis Von Houtte. Trusses very large, bright scarlet.
- La Vesuve. Color a glowing scarlet, flowers large and very double.
- Le Nègre. Rich maroon imbricated petals, entirely distinct in color from any of its kind.
- Le Progrès. Magenta color, suffused with purple; by far the best double yet sent out.
- Le Vengeur. Trusses of immense size, color a light cherry.
- Lord of Lorne. The trusses are large, and well formed, color deep crimson.
- Louis Blanc. Flowers large, double, borne on fine trusses, color crimson purple, free grower and profuse bloomer. 25 cts.
- Mad. Debray. Color bright scarlet, flowers very large.
- Mad. Hock. Color very brilliant dark rose, flowers very large.
- Mad'llie Louise Delesalle. Very double, of a fine clear rose.
- Marie Lemoine. Similar to *Madame Lemoine*, but of a more chaste pink.
- Miss Mary C. Saul. This beautiful variety originated in our establishment; it has immense trusses of very double flowers, which are of a soft rosy pink.
- Madame Lemoine. The color is a beautiful rose.
- Monsieur Crousse. A magnificent variety of dwarf compact growth, large, full double flowers, of a rich carmine color, shaded with scarlet; very distinct. 25 cents.
- M. A. Petot. Bright crimson, large truss.
- Nimrod. An intense scarlet, having large globular trusses.
- Madame Bondet. Flowers of good size, of a beautiful deep scarlet.
- Madame Chas. Martine. Trusses of model shape, tender china rose color shaded with salmon.
- Madame Durand. Orange scarlet, large fine pips.
- Madame Raconsot. Large truss, color a brilliant scarlet.
- Mr. Gladstone. Trusses immense, color bright rosy crimson.
- Pink Perfection. Deep bright pink, the deepest of all this shade of color.
- Rose Queen. A clear deep rose, trusses very large and globular.
- Ruhm Von Russelsheim. Large truss of crimson flowers.
- Reynold's Hole. Flowers large, cupped, very double, and of a striking scarlet; truss very large, habit somewhat vigorous, a most showy variety. 25 cts.
- Speculum. Color blackish carmine, like the Rose "Géant des Batailles;" individual flowers very pretty, on long foot-stalks; petals imbricated as in the Camellia; good truss, habit dwarf, short-jointed and slender. 25 cts.
- Surpasse Glory de Nancy. Bright rose carmine.
- Triomphe. A brilliant scarlet color.
- Triomphe de Loraine. Of the finest cherry carmine.
- Talabot. Flowers large, double, of a bright amaranth color, good habit, profuse bloomer; a superb bedding variety. 25 cts.
- Victor Lemoine. Trusses about eight inches in diameter, color finest scarlet.
- Wilhelmine Von Verna. Large trusses of a brilliant red.
- Wilhelm Pfitzer. Dwarf, dazzling orange scarlet color.
- Rose Pur. Flowers of a deep warm rose, tinted with violet.
- Baron von Jungenfeld. Trusses large, color a magenta rose.

GOLDEN SELF AND BRONZED ZONED GERANIUMS.

This section is robust and vigorous in growth as the plain leaved varieties. Having beautiful broad leaves, either of a plain golden color or with rich bronze zones, they are admirable for contrast with the other colors, either in or out doors.

Price 20 cents each. \$2 per dozen.

- | | |
|------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Arthur H. Wills. Zone dark chestnut brown, bright yellow margin. | Her Majesty. Yellow foliage, with a light zone. |
| Annie Keeler. Golden ground, very brilliant zone. | Impératrice Eugénie. Golden leaf with zone of bright chocolate. |
| Beauty of Calderdale. Zone of a bright reddish bronze, on a yellow ground. | L'Africaine. Leaves yellow, with a deep bronze zone. |

Zonale.

FUCHSIAS—General Collection.

The following list is a selection of the best varieties, in habit of growth, distinct shades of color, and both single and double flowers. The varieties of 1876 are chiefly incorporated with these. Those marked (d) have double corollas.

Price 20 cents each, (save where priced,) \$2 per dozen, \$15 per 100.

Agnes. White sepals, crimson tube and corolla.

Agamennon, (d.) Rich scarlet sepals, corolla plum.

Arabella. Pure white tube and sepals, corolla rose.

Arabella Improved. White tube and sepals, reflexed, corolla a rich rose.

Algolina Braem, (d.) Deep scarlet tube and sepals, pure white, striped with rose.

Avalanche, (Smith,) (d.) Very double, compact and beautifully formed flowers, corolla pure white, of extra size, tube and sepals brilliant carmine scarlet. 25 cents.

American Banner. Perfectly striped and blotched with red on a splendid blue ground, colored corolla. 25 cts.

Alpha, (d.) A splendid variety, coral red tube and sepals, the finest of the double kinds.

Alsacien-Lorrain. Reflexed carmine sepals, white corolla, very double. 40 cents.

Barcelona. Sepals rosy carmine or scarlet, elegantly recurved.

Cannell's Favorite. The most beautiful light Fuchsia ever sent out. Tubes and sepals pure white, the latter very broad, with the best reflex; corolla scarlet. 40 cents.

- Chicago, (*d*). Carmine tube and rich light carmine sepals, clear white corolla, very double. 25 cents.
- Coquette, (*d*). Tube light carmine, the sepals waxy white, tinged with rosy pink.
- Delight. Corolla pure white, tube and sepals bright crimson, corolla large bell-shaped, and remarkably free blooming. 30 cents.
- Duke of Edinburgh. A beautiful variety of the light mauve colored class.
- Deutscher Kaiser, (*d*). The single *F. Germania* was much admired; this is a double flowered variety.
- Duchess de Gerolstein. White tube and sepals, corolla crimson.
- Dominiana. Large crimson tube, fine winter bloomer. 30 cents.
- Extraordinary, (*d*). Sepals scarlet, large, corolla rich violet blue, very large.
- Desideratum. Tube and sepals deep scarlet, reflexed, corolla double and deep bluish violet in color, the edges of the petals are beautifully fringed. 30 cents.
- Evening Star. Tube white with broad sepal, corolla brilliant carmine.
- Elm City, (*d*). Corolla forming rich crimson balls, very good.
- Emperor of Brazil, (*d*). Crimson tube and sepals, corolla a rich purple.
- Emperor of Germany, (*d*). Tube and sepals scarlet, corolla deep red.

|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| | Each. |
| Beauty of Swanley. One of the prettiest and best shaped light Fuchsias ever raised. Pure waxy white tube and sepals, the latter most elegantly reflexed; corolla bright pink, and well shaped; strong branching grower, throwing out large pendulous bunches of blooms; very graceful. | |
| Black Prince. Tube and sepals bright waxy carmine color, sepals large and broad with pale green tips, and large open pale pink corolla, margined with deep rose; a very distinct and vigorous free-branching habit..... | 0 75 |
| Covent Garden Scarlet This in every way promises to be the pride of the market. Bright scarlet tubes and sepals, perfectly reflexed, large bright blue purple corolla, stiff sharp pointed growth, and its whole habit and abundance of flowers all that can be desired. This and the following will be largely grown for market. | |
| Covent Garden White. This variety will prove equally valuable in the white tube and sepal section The growth and shape most model-like. | |
| Commandant Taillant. A very vigorous kind, with foliage resembling the old <i>F. Globosa</i> , large, pure white flowers with carmine sepals. | |
| Fairy Queen. Tube and sepals white, the latter finely recurved, corolla rich rosy-carmine, growth pendulous, extra free bloomer, good exhibition variety. | |
| King Alfonso. Sepals carmine-scarlet. broad and horizontally spread, slightly recurved; corolla very large and double, rosette-like, rich violet color. | |
| Lord Byron. Tube and sepals bright crimson, with large open bell-shaped black corolla, the darkest yet known; fine habit, with sepals finely recurved | 0 75 |
| Indian Chief. Tube and sepals carmine pink, the latter finely recurved, with very large open violet blue corolla, finely shaded with red from the base; habit good, leaf medium size, free bloom, a perfect flower, | 0 75 |
| Lady Brodie. Tube and sepals medium sized, blush white, the latter well recurved, corolla rich rose with carmine belt, good habit and free bloom..... | 0 75 |
| Mrs. H. Cannell. This is certainly one of the greatest lifts in bringing the double white corolla to perfection, and equal to the darker kinds, both in habit, size and growth ever yet introduced, and is unquestionably the most valuable acquisition and the queen of new florist flowers for the year. The whole appearance of the plant much resembles the dark corolla <i>Avalanche</i> sent out by Messrs. E. G. Henderson & Son, which is universally considered the best variety in cultivation, | 0 40 |
| Mrs. Gadick Ditton. Recurved lanceolate white sepals, corolla large bright flamed carmine, flowers in large terminal drooping clusters, graceful variety..... | 0 75 |
| Maid of Honor. Tube and sepals ivory-white, medium sized and gracefully recurved, corolla rich magenta rose; habit neat and erect..... | 0 75 |

- Mizpah. Tube and sepals white, corolla rich violet crimson, fine habit, a very fine variety.
- Peasant Girl. Tube and sepals white, finely recurved; corolla the finest tint of porcelain blue; neat medium habit; distinct and beautiful.
- Procumbens. See NOVELTIES.
- Rev. T. Wiltshire. One of the boldest and best shaped flowers in the bright blue corolla class; flowers of the most perfect shape and of great substance, strong grower.
- Rosa Bonheur. Bluish-white tube, and sepals well recurved, corolla rich rose with shaded carmine belt or margin, free erect habit, flowers in gracefully drooping terminal clusters..... 0 75
- Swanley Gem. Scarlet sepals and tube, rose-colored corolla, beautiful habit, free bloomer, a remarkably fine variety.
- Sunray. One of the most beautiful plants ever offered; colors as rich and clear as in any Tri-color Pelargonium; the leaves, which are very large, are of a rich bright crimson, white and bronzy green, in about equal parts. It will make a magnificent market plant. Scarlet tube and sepals, with light pure purple corolla..... 0 30
- T. T. Lawden. Large well made flower of the dark blue corolla class, good strong growth, with a beautiful branching habit
- White Souvenir de Chiswick. This is the most showy light Fuchsia yet introduced, and somewhat resembles the dark variety of this name. It throws out magnificent branches of blooms, pure white tube and sepals, the latter long and very boldly and beautifully reflexed; corolla bright rose pink and cup-shaped, and of great substance; habit of growth strong.
- White Unique. The tube and sepals bright crimson, the latter well reflexed, the corolla large and pure white, exceedingly double and of exquisite form; it is of a good growth, and very fine flowering..... 0 40

DAHLIAS—General Collection.

SHOW FLOWERS.

Our collection of Show Flowers received first premium at the Maryland Horticultural Society's exhibition, September, 1875, and again in September, 1876.

Our collection of this beautiful flower is unrivalled. We import annually all the new varieties of merit, and none are retained in our collection that do not come up to the standard of perfect flowers. It now embraces all the finest Show Flowers in cultivation. Dry pot roots of most can now be supplied, or strong plants in May, either can be sent long distances by mail.

Price 25 cents each, \$2.50 per dozen; 50 very fine varieties for \$9. Mailed free.

- | | |
|--------------------------------------------------------------------------|------------------------------------------------------------------|
| Ada Tiffin. Light peach, beautiful and chaste edge flower, splendid form | Earl of Shaftesbury. Rich purple exquisite shape. |
| Andrew Dodds. Nearly black, darkest flower. | Earl of Radnor. Magnificent plum, intense color, pure self. |
| Aristides. Deep purple, splendid form | Emperor. Tinted purple, deep maroon. |
| Alexander Cramond. Shaded maroon, a most striking flower. | Emily Williams. Light ground, edged and tipped with vermilion |
| Bellona. Red ruby large, fine form. | Florence Pontin. White ground, with a deep distinct crimson tip. |
| Bob Kidley. Bright red, splendid form. | Gipsy King. Dark crimson, fine. |
| British Triumph. Very dark crimson. | Golden Beauty. A beautiful clear yellow, of the finest quality. |
| Crimson King. Beautiful crimson, fine form, very constant. | Herbert Turner. French white, with soft tinge of lilac |

FERNS.

*ADIANTUM AMABILE.

A very elegant species, with fronds of a beautiful light green color, small and elegant in regard to the size and form of their ultimate divisions. It has been introduced from Peru, and is a free-growing cool stove Fern, attaining the height of from 15 to 18 inches. The fronds average 14 inches in length by 10 inches in width, and when young possess a most agreeable perfume. 75 cents.

*ADIANTUM SEEMANNI.

A noble species, producing fronds 2 feet long, with a comparatively slender glossy black stipe, bare at the lower part, and bearing, towards the top, from 4 to 8 magnificent large pinnæ, which are attached by a slender petiole an inch long. \$2.

*ADIANTUM FARLEYENSE.

The most magnificent variety of this handsome family; the fronds are of the size and form of *A. trapeziforme*, but pendent, and all the large pinnules are deeply fringed and crisped. \$1.50 to \$3.

*ADIANTUM PERUVIANUM.

A magnificent species, rivalling the well-known *A. trapeziforme* in the size of its pinnules, and surpassing it in the elegance of its large compound drooping fronds. It is a strikingly ornamental Fern. \$1.

*DAVALLIA MOOREANA.

A most beautiful Fern. The stipes are quite smooth and pale colored. The fronds are from 2 to 3 feet long, and from 1 to 2 feet wide at the base, triangular and pointed, of a graceful arching habit of growth, and most elegantly cut into a multitude of small blunt oblique soriferous segments; their color is a pale green, and they are very remarkable for the dotted appearance. \$1.

Adiantum, (Maiden's Hair.) There is no family of Ferns that approaches these in grace and beauty. For wardian cases, hanging baskets, etc., they are indispensable. Our collection contains all the species of value.

* \$10 Collection.

Embraces the collection of plants as in the \$15 collection, from *Monthly Roses* to *Ornamental Grasses* inclusive.

* \$5 Collection.

Half the \$10 collection.

* Plants by Mail.

We have for some years forwarded plants in large numbers by mail, to the most distant parts of the Union, as Texas, Utah, the Pacific Coast, with perfect success. All of which are properly labelled and carefully packed in boxes or oiled paper. The following plants will be sent by mail, pre-paid, at the prices annexed, or any new plant can be forwarded in the same way. No order for less than one dollar will be filled. This rule is necessary, as the mailing of one or two cheap plants will not compensate us, in the hurry of business, for the time and labor of packing, directing, pre-paying postage, etc. Our selection, one-quarter of a dozen at dozen rates.

	Each.	.

All plants suitable for mailing at Catalogue rates. Not less than one dollar's worth sent in one order.

Garden and Flower Seeds.

Having been many years engaged in the Seed business, both as a grower and dealer, I can, with confidence, recommended all articles offered. They are NEW, PURE and GENUINE. See *Catalogue No. 2.*

Fruits, Ornamental Trees, Evergreens.

A very extensive stock of Fruit, Ornamental Trees, Evergreens, Shrubs, Roses, etc., are grown at my Nurseries, on the Seventh Street Road, all of which are of the most vigorous description, and are offered at low rates. See *Catalogue No. 1.*

HARRY KING--New Zonale.

This is certainly the most magnificent vivid crimson Zonal ever yet sent out, and the above engraving conveys but a very inadequate idea of its immense trusses; color intense and brilliant scarlet, considerably darker and more glowing than *Jean Sisley*, large white eye, each pip of fine shape, and of great substance, which causes every petal to reflex as soon as each bud expands, consequently each flower remains a longer time in perfection than any other Zonal; it also has the valuable property of keeping its centre well filled up. The color of this variety totally eclipses all other older kinds, and is unquestionably the most magnificent crimson scarlet Zonal ever sent out. 25 cents each.

Campanula Medium Calycanthema Alba.
Campanula Medium Calycanthema Cœrulea.

Few of our hardy border flowers are more pleasing, or of more value as garden ornaments, than the old Canterbury Bell, called *Campanula Medium* by botanists—a biennial plant, of pyramidal growth, which inhabits Central Europe, and was introduced to our collections nearly three centuries ago, but which still holds its own; and which, whether we regard the forms with single or double blossoms, purple, blue, rose or white, of which it gives a rich harvest, stands unrivalled for its beauty.

The ordinary single form bears flowers of the shape of a broad cleanly-modelled and open bell, and the usual double forms are made up by the crowding into the interior of this bell of certain petaloid out-growths of the floral whorl, producing a flower on the model of that of a double *Petunia*. The variety we are now describing takes quite a different development. In habit, the plant resembles the well-known old blue or white Canterbury Bell, “but the corolla is much larger, and the calyx in addition is enlarged to nearly 4 inches in diameter, presenting the form of a saucer, and changed from its ordinary green color to the same hue as that of the corolla.” The broad bell-shaped corolla of the single flower is perfectly formed, but instead of the usual small leafy calyx, this organ becomes much enlarged, and takes on a petaloid character; and it is this which forms the peculiar flower, and adds so much both to its interest and to its beauty. Price 25 cents.
